SECTION VII BREIF SUMMARY OF BUSINESS/ACTIVITIES OF ISSUER

7.1 OVERVIEW OF BUSINESS

We are a domestic financial institution with more than three decades of experience in the Indian renewable energy sector. We provide financial assistance to renewable energy projects, companies, and manufacturers in India for power generation, equipment supplies and fuel source projects including wind power, solar power, hydro power, biomass, co-generation, and waste to energy as well as energy efficiency and conservation. Our comprehensive suite of financial products and services includes various fund-based financial products including long-term and short-term project and manufacturing loans/ loans to government entities, take out financing, bridge loans, securitization of project/GBI receivables, Factoring for purchasing receivables for purchasing receivables of solar power developers payable by eligible govt. entities, various financing schemes for renewable energy suppliers, manufacturers and contractors as well as non-fund based assistance, like performance guarantees, letters of comfort, letters of undertaking and also consulting services.

Currently, we are a Schedule A, majorly GoI owned enterprise under the administrative control of the Ministry of New and Renewable Energy (the “MNRE”). Our Company is a “Public Financial Institution” (a “PFI”) under Section 2(72) of the Companies Act, 2013 and is registered as a non-banking financial company (a “NBFC”) with the Reserve Bank of India (the “RBI”). We believe that our classification as a PFI enhances our ability to raise funds on a cost-competitive basis (including through the issuance of various types of bonds that offer certain tax benefits to the Bondholders). We also were conferred with the Mini Ratna (Category 1) status in June 2015 by the Department of Public Enterprises and later upgraded to “Navratna” Status in April 2024.

We were established as an integral part of, and have played a strategic role in, the GoI’s initiatives for the promotion and development of the renewable energy sector in India. We have been involved in the development and implementation of various policies and structural and procedural reforms in the renewable energy sector. Under the IREDA-NCEF Refinancing Scheme, we utilize funds received from the National Clean Energy Fund (“NCEF”) to refinance renewable energy projects for biomass (up to 10MW) and small hydro (up to 5MW). We have also been involved in various GoI programs for the development of renewable energy sector including the Wind GBI Scheme, and the Solar GBI Scheme. We are the implementing agency of the Production Linked Incentive (“PLI”) Scheme as well as Central Public Sector Undertaking (CPSU) Scheme Phase-II on behalf of the MNRE. The National Bioenergy Programme was launched by the MNRE in November 2022 for the period from Fiscal 2022 to Fiscal 2026. The total outlay of the programme under Phase-1 is ₹ 8.58 billion, out of which IREDA has been designated as the implementing agency for Programme on Energy from Urban, Industrial and Agricultural Wastes and Residues and the Scheme to Support Manufacturing of Briquettes and Pellets and Promotion of Biomass (non-bagasse) based cogeneration in Industries for ₹ 7.58 billion.

Board of Directors of IREDA at the meeting held on 15th February, 2024 had accorded approval for incorporation of a Wholly Owned Subsidiary Company of IREDA Ltd., with the proposed name “IREDA Global Green Energy Finance IFSC Ltd” in IFSC - GIFT City, upon receipt of approvals from NITI Aayog, DIPAM and RBI. Subsequently, ROC approved the aforementioned name of the subsidiary and IREDA Global Green Energy Finance IFSC Ltd. has been incorporated on 07.05.2024. IREDA has also obtained a Provisional Letter of Allotment (PLOA) from Savvy ATS Realty LLP w.r.t. office space at Pragma Accelerator in GIFT City SEZ, Gift City, Gandhinagar for the registered office address of the company.

7.2 BUSINESS

COMPETITIVE STRENGTH

IREDA is committed to maintain its position as a leading organization to provide efficient and effective financing in Renewable Energy & Energy Efficiency/Conservation. Focus of its services shall be:

- i. Customer Satisfaction.
- ii. Timely and prompt response.
- iii. Increase market share in renewable energy financing.
- iv. Become an apex level financial institution.
- v. Encourage micro lending through intermediation.
- vi. Professional excellence.
- vii. Organizational flexibility.

7.3 STRATEGY

Our objective is to devise and offer innovative financing and consolidate our position as the leading financial institution in the renewable energy sector. To fulfil this goal, we plan to pursue the strategies set forth below.

Continue to leverage our industry expertise and relationships to capitalize on the expected growth in the Indian renewable energy sector

National targets of 500 GW of non-fossil fuel capacity by 2030 have been instrumental in catalyzing an unprecedented growth in renewable energy capacity installations in India. This has propelled India at the top of the global league as the 4th largest solar & wind power base in the world and fastest growing capacity among the top 5 RE countries.

During COP26, India has also cemented its position as a global leader in the climate & transition space by announcing its “Panchamrit” targets for renewable energy & climate action:

- i. Reach 500 GW of non-fossil energy capacity by 2030
- ii. Meet 50 percent of energy requirements from renewable energy by 2030
- iii. Reduce the total projected carbon emissions by one billion tonnes from now onwards till 2030
- iv. Reduce the carbon intensity of the economy by less than 45 percent by 2030
- v. Achieve the target of Net Zero by 2070

Our plan is to continue to leverage our industry expertise and relationships to capitalize on the expected growth in the Indian renewable energy sector. With over three decades of experience, we are one of the preferred financing providers for the renewable energy sector in India. Our relationships with the Central and State governments, various regulatory authorities, significant power and renewable energy sector organizations, Central and State power utilities, private sector project developers, as well as other intermediaries in the renewable energy sector will further help us in capitalizing the growth.

Expand and diversify our products and services

We believe that our diverse offering of financial products and services to a wide range of projects and businesses in the renewable energy sector has been an important competitive advantage over other lenders currently operational and entering the renewable energy financing domain. Our strategic focus will be to continue to expand our financial products and services offering as well as to diversify the types of projects and customers that we serve.

We have identified the following key areas for diversification and expansion which are in line with the focus areas of the Government of India:

- (i) Green hydrogen and its derivatives (including manufacturing): The GoI has announced the National Green Hydrogen Mission with an objective to make India a global hub for production, usage and export of green hydrogen and its derivatives and approved an outlay of ₹190 billion to help achieve an annual production target of 5 MMT by 2030 for facilitating the net-zero target; (Source: CARE Report)
- (ii) Pumped hydro storage power plants: Pumped hydro storage, where water is pumped uphill into a reservoir and released to power turbines when needed, has been identified to have a potential of 96,529 MW in India as per the Central Electricity Authority. (Source: CARE Report)
- (iii) Battery storage value chain (including manufacturing, storage, recycling): NITI Aayog estimates the market size of battery sector to be around ₹163.8 billion in Fiscal 2022 and in the accelerated case scenario, the market size for stationery and mobile batteries could surpass ₹491.4 billion by 2026 and ₹1,228 billion by 2030. An investment of ₹3,493 million will be required between Fiscal 2024 and Fiscal 2032 to achieve the above battery storage requirement; (Source: CARE Report)
- (iv) Offshore wind: The MNRE has set a target of 30 GW by 2030 for offshore wind energy, which is intended to provide confidence to project developers in India; (Source: CARE Report)
- (v) Green energy corridor: The green energy corridor scheme was launched in 2015 for setting up of transmission and evacuation infrastructure to facilitate evacuation of electricity from renewable energy projects and the intra-state transmission system projects has been sanctioned to eight renewable energy states for evacuation of over 20,000 MW of renewable energy; (Source: CARE Report)
- (vi) Rooftop solar power: Phase-I of this initiative offered incentives and subsidies for the residential, institutional, and social sectors, while achievement-based incentives were also offered for the government sector. Phase-II began in February 2019 with the goal of reaching a total capacity of 40,000 MW by 2022 with approximately 3.7 GW of capacity built so far, with another 2.6 GW under construction in the residential market. Central Financial Assistance is provided at 40% for systems up to 3 kW capacity and 20% for systems with capacities more than 3 kW; (Source: CARE Report) and

Green mobility value chain (fuel cells, charging infrastructure): The GoI has set a target to achieve 100% electric mobility for public transport and 40% electrification of private vehicles by 2030. The current market size of electric two-wheelers, electric three-wheelers and electric four-wheelers is estimated to be approximately ₹90 billion, ₹100 billion and ₹85 billion, respectively. Sales across each EV segment is expected to clock strong growth going forward owing to the government's push towards green mobility.

Continue to focus on improving the credit quality of our loan book

We will continue to focus on improving the credit quality of our loan book with the goal of reducing our NPA levels. We aim to identify credit issues among renewable energy borrowers and address these issues by modifying our underlying policies and procedures.

We follow a structured approach to improve our review, monitoring and recovery process to improve our collections on existing impaired loans. We review our debt repayment positions on a regular basis to identify potentially problematic loans at an early stage and prepare for immediate corrective action to ensure recovery from these loans.

Continue to focus on improving processes and delivery

With the goal of client retention and generating new business development opportunities, we are focused on improving our delivery processes to customers including lowering transaction costs, expanding our geographic reach, improving customer satisfaction and reducing transaction time.

Lowering transaction costs

We intend to reduce the transaction cost of our customers. For example, we are working to lower customer costs through

- our online loan application for customers to facilitate submission of loan applications through our website as a step towards making processes more transparent, system driven and to reduce cost; and
- an operationalized customer portal to facilitate our customers view of the status of their applications and projects and repayment schedules online.

Improving customer satisfaction

Our endeavor is to improve customer satisfaction through technological intervention, reducing the transaction time and continuous improvement and simplification of systems and processes.

Increase our market visibility to new and existing renewable energy borrowers

We believe that we have developed a trusted position as a provider of financing products and services in the Indian renewable energy market. As the Indian banking and financial sector continues to become more competitive, we intend to increase the market visibility of our product and service offering and our brand. We were the first Indian company to raise green masala bonds from the international market with listings on international exchanges (SGX and LSE). For the last three decades, we have been supporting establishment of renewable energy projects and have been successful in the commercialization of sustainable energy technologies in India by introducing various innovative schemes for development and financing of the sector.

7.4 PRODUCTS

We are primarily engaged in providing finance to projects, companies, manufactures and schemes that generate energy through new or renewable energy sources, through debt financing.

We operate from our business centre, corporate office and registered office in **New Delhi**, our branch offices in **Mumbai, Chennai, Bengaluru, Guwahati, Bhubaneshwar, GIFT City Gujarat and Hyderabad**.

We provide financial assistance to the renewable and energy efficiency projects including wind power, solar power, hydropower, biomass, co-generation and waste to energy as well as energy efficiency and conservation, E- mobility and new technologies such as battery energy storage systems and green hydrogen.

Fund Based Products

- * Term loans for RE generation, manufacturing projects and EEC projects
- * Project Specific Funding (“PSF”)
- * Takeover financing from banks and financial institutions
- * Short term loans to RE energy developers, suppliers, contractors and manufacturers
- * Term loan facility to government bodies, DISCOMs, transport companies and state-owned trading companies
- * Guaranteed Emergency Credit Line
- * Co-financing, underwriting of debt, loan syndication and consortium financing
- * Bridge loan assistance to RE developers against capital subsidies or VGF available under various state or GoI schemes
- * Loan against securitization of future cash flows

- * Line of credit to NBFCs for on- lending to RE and EEC projects
- * Financing rooftop solar PV grid-connected or interactive power projects (industrial, commercial and institutional)
- * Financing of transmission projects
- * Top-up loan
- * Financing manufacturing of biomass pellets, briquettes, torrefied pellets and refuse derived fuels
- * Financing of new ethanol distilleries and expansion of distillery production
- * Financing new technologies and funding of green mobility segment
- * Financing for compressed bio-gas under Sustainable Alternative Towards Affordable Transportation Scheme
- * Special products for funding RE projects through bonds, banks loans and other financial instruments
- * Refinancing of loans
- * Financing rooftop solar projects and PM-KUSUM projects

Non-Fund Based Products

We also provide non-fund based assistance including:

- * Letters of comfort / undertaking;
- * Guarantee schemes such as
 - (i) Credit enhancement guarantee schemes,
 - (ii) Guarantee assistance scheme to RE suppliers, manufacturers, developers and EPC contractors; and
- * Consultancy services.

7.5 LENDING POLICY

Our Company has well-developed policies and/or guidelines in order to streamline the funding process. Regular review based on prevailing market practices, formulation of new policies and guidelines are being carried out from time to time to strengthen the funding process.

7.6 QUALITY POLICY

Committed to maintain its position as a leading organization to provide innovative financing in Renewable Energy & Energy Efficiency/Conservation and Environmental Technologies through efficient system & processes for providing total satisfaction and transparency to its customer. Strive for continual improvement in the quality of services to its customers through effective quality management system

7.7 QUALITY OBJECTIVES

- i. Drive towards total customer satisfaction.
- ii. Continual up-gradation of capability and improvement in the professional skills of employees.

8.2 CORPORATE GOVERNANCE

Our Company believes that good corporate governance is an important constituent in enhancing stakeholder value. Our Company has in place processes and systems whereby it complies with the requirements to the corporate governance provided in SEBI LODR Regulations (to the extent applicable to a company which has listed debt securities) and the applicable RBI guidelines. The corporate governance framework is based on an effective independent Board, separation of the supervisory role of the Board from the executive management team and constitution of the committees of the Board, as required under applicable law. Our Company believes that its Board is constituted in compliance with the Companies Act and the applicable SEBI regulations. The Board functions either as a full Board or through various committees constituted to oversee specific operational areas.

SECTION IX RISK FACTORS

The management of the Issuer believe that the following factors may affect the Issuer's ability to fulfil its obligations under the Bonds. All of these factors are contingencies which may or may not occur and the Issuer is not in a position to express a view on the likelihood of any such contingency occurring. These risks may include, among others, business aspects, equity market, bond market, interest rate, market volatility and economic, political and regulatory risks and any combination of these and other risks. Prospective Investors should carefully consider all the information in this General Information Document (GID), including the risks and uncertainties described below, before making an investment in the Bonds. To obtain a complete understanding, prospective Investors should read this section in conjunction with the remaining sections of this General Information Document (GID), as well as the other financial and statistical information contained in this General Information Document (GID). If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, the Issuer's business, results of operations and financial condition could suffer, the price of the Bonds could decline, and the Investor may lose all or part of their investment. More than one risk factor may have simultaneous effect with regard to the Bonds such that the effect of a particular risk factor may not be predictable. In addition, more than one risk factor may have a compounding effect which may not be predictable. No assurance can be given as to the effect that any combination of risk factors may have on the value of the Bonds. The inability of the Issuer to pay interest, principal or other amounts on or in connection with the Bonds may occur for other reasons which may not be considered significant risks by the Issuer based on information currently available to them or which they may not currently be able to anticipate. The Investor must rely on its own examination of the Issuer and this Issue, including the risks and uncertainties involved. The Investor should carefully consider all the information in this General Information Document (GID), including the risks and uncertainties described below before making an investment in the Bonds. The risks and uncertainties described in this section are not the only risks that the Issuer currently faces. Additional risks and uncertainties not known to the Issuer or that it currently believes to be immaterial may also have an adverse effect on its business, prospects, results of operations and financial condition.

RISK RELATING TO BUSINESS OR INDUSTRY

1. Our business and financial performance could suffer if we are unable to effectively manage our growing asset portfolio and control the level of our NPAs.

As at March 31, 2024, March 31, 2023 and March 31, 2022 the total value of our gross NPAs was ₹1,41,085 lakhs, ₹1,51,335 lakhs, ₹1,76,825 lakhs respectively. Our gross NPAs represented 2.36%, 3.21% and 5.21% of our loans as at March 31, 2024, March 31, 2023 and March 31, 2022, respectively. Our net NPAs represented 0.99%, 1.66% and 3.12% of our loans as at March 31, 2024, March 31, 2023, March 31, 2022, respectively. In Fiscal 2019, the RBI withdrew the exemptions from their prudential norms which were previously available to all Government NBFCs ND SI vide their circular dated May 31, 2018. As per the revised RBI norms, the NPA classification, as at March 31, 2020, shall include any loan asset that is in default for more than 90 days. Further, as per RBI guidelines updated on March 03, 2022, NPA includes any loan asset that remains overdue for a period of 3 months or more. In addition, the increases in our net NPAs and gross NPAs has been primarily due to delay in payment from State electricity distribution companies ("DISCOMs"), tariff and regulatory related issues, force majeure events (drought, flood, diversion of water of river/canal), delay in project implementation and commissioning, technology and generation related issues, rise in raw material prices (biomass/MSW/gas) and financial stress due to other factors. Although we are increasing our efforts to improve collections and to foreclose on existing impaired loans in a timely manner, there cannot be any assurance that we will be successful in our efforts or that the overall quality of our loan portfolio will not deteriorate in the future. If we are unsuccessful in controlling or reducing our impaired loans, if there is a significant increase in impaired loans, or if there is deterioration in the quality of the assets that we hold as security, our future financial performance could be materially and adversely affected.

While we had already made provisions with respect to, we may need to make further provisions if recoveries with respect to such NPAs do not materialize in time or at all. Any increase in NPAs will reduce the net interest-earning asset base and increase provisioning requirements, thereby adversely affecting our results of operations and financial condition. Any significant increase in provisions would materially and adversely impact our financial performance. Various factors beyond our control, like changes in electricity tariffs, prolonged recessionary conditions in the world economy, a sharp and sustained rise in the interest rates, developments in the Indian economy, changes in Indian laws, regulations and policies and other factors beyond our control could have an adverse impact on the quality of our loan portfolio. Further, certain assets classified as restructured may subsequently be classified as delinquent or non-performing if a borrower fails to restore its financial viability and honour its loan servicing obligations. There can be no assurance that the debt restructuring criteria approved by us will be adequate or successful and that borrowers will be able to meet their obligations under restructured loans. Any resulting increase in delinquency levels may adversely impact our business, financial condition and results of operations.

2. Volatility in interest rates could adversely affect our business, net interest income and net

interest margin, which in turn would adversely affect our business, results of operations and financial condition.

Our business depends on interest income from our loans made by us and the interest rates at which we borrow from banks and/or financial institutions. Accordingly, we are affected by volatility in interest rates in our borrowing and lending operations. Interest rates are highly sensitive to many factors beyond our control, including the monetary policies of the RBI, deregulation of the financial sector in India, domestic and international economic and political conditions and other factors. Furthermore, the rise in inflation and consequent fluctuation in interest rates, repo rates (the rates at which the RBI lends to commercial banks) and reverse repo rates (the rates at which the RBI borrows from commercial banks) has led to revision in the interest rates on loans provided by banks and financial institutions. Due to these factors, interest rates in India have experienced a relatively high degree of volatility.

Our ability to raise funds on competitive terms and in a timely manner, and the pricing of our loan products are determined by a number of factors including our current and future results of operations and financial condition, macroeconomic factors, our credit ratings, the regulatory environment and policy initiatives in India and developments in the international markets affecting Indian economy, many of which are beyond our control. If we suffer a decline in net interest margins, we would be required to increase our lending activity in order to maintain our profitability. In case we are not able to do so we may suffer reduced profitability or losses which may adversely affect our business, results of operations and financial condition.

Furthermore, the majority of the loans taken by us are long-term in nature and are fixed rate borrowings. However, our portfolio includes loans where the interest rates are subject to periodic resets. When interest rates decline, we may be subject to greater repricing and prepayment risks. During periods of low interest rates, our borrowers may seek to reduce their borrowing cost by asking to reprice loans. When assets are repriced, the spread on loans, which is the difference between the average yield on loans and the average cost of funds, could be affected. If we reprice loans, our financial results may be adversely affected in the period in which the repricing occurs. To the extent that our borrowers prepay loans, the return on our capital may be impaired as any prepayment premium we receive may not fully compensate us for the redeployment of such funds elsewhere. When interest rates increase, we may be unable to pass on such increase to the borrowers in full by increasing the corresponding borrowing interest rates and increase in the interest rate on reset may also result in the borrowers' prepayment of such loans. Such prepaid loans may not be immediately redeployed by us which may result in loss of interest income. If we are unable to effectively and efficiently manage such interest rate variations over the duration of the project loans, our business, results of operations and financial condition may be adversely affected.

3. The COVID-19 has had, and a similar pandemic could have, certain adverse effects on our business, operations, cash flows and financial condition.

The COVID-19 pandemic caused substantial disruption to the global economy and supply chains, creating significant volatility and disruption in financial markets, including India. Future events such as the COVID-19 pandemic may adversely affect overall business sentiment, as well as our business, results of operations and financial condition.

4. Our credit ratings have been recently upgraded however in past our ratings were downgraded Further downgrading in our credit ratings could adversely affect our business, results of operations and financial condition.

Our external credit ratings assess our overall financial capacity to pay our obligations and are reflective of our ability to meet financial commitments as they become due. Rating agencies may reduce, or indicate their intention to reduce, the ratings at any time.

Further, India Ratings had on September 4, 2019 changed our domestic bonds' outlook to "Negative" and affirmed our "IND AAA" rating; further on September 1, 2020, India Ratings downgraded our bonds and subordinated debt to "IND AA+/Stable". In July 2023, Brickworks Rating migrated our rating to "AAA Stable Issuer Not Cooperating" from "AAA Stable" and later in January 2024 downgraded to BWR BB+/Stable/ ISSUER NOT COOPERATING. This was on account of an ongoing challenge to Brickwork's license, owing to which we sought information on the validity of the license before providing data. However, during February 2024, rating was further upgraded to BWR AAA /Stable/Removal from ISSUER NOT COOPERATING category/Upgraded.

IREDA had taken rating from Moody's and Fitch for the Masala Bonds which was withdrawn post redemption of Masala Bonds in October 2022. IREDA has credit rating from rating agencies such as ICRA, CARE, India Rating and Acuite. However, Acuite has assigned "AAA" Rating for our Bank Loans, ICRA has recently upgraded our rating from AA+(positive outlook) to AAA(Stable).

There can be no assurance that we will not experience any further downgrade in our debt ratings in future. The rating agencies can also decide to withdraw their ratings altogether, which may have the same effect as a reduction in our

ratings. Any further reduction in, or withdrawal of, our ratings may increase our borrowing costs, limit our access to equity and debt capital markets and adversely affect our ability to engage in business transactions, particularly longer-term transactions, or retain our customers, thereby affecting our net interest income and net interest margin. In addition, any further downgrade of our credit ratings could result in additional terms and conditions being included in any additional financing or refinancing arrangements in the future. This, in turn, could reduce our liquidity and have an adverse effect on our business, results of operations and financial condition.

5. We operate in a highly competitive environment and increased competition in lending to the renewable energy sector could have a material adverse effect on our business, results of operations and financial condition.

The financial and banking sector in India is highly competitive and we compete with a number of public sector finance companies, public sector banks, private banks (including foreign banks), financial institutions and other NBFCs. Competition in our industry depends on, among other factors, the ongoing evolution of GoI policies relating to the industry, the entry of new participants into the industry and the extent to which there is consolidation among banks, financial institutions and NBFCs in India. Many of our competitors may have larger resources or balance sheet sizes than us and may have considerable financing resources. In addition, since we are a non-deposit accepting NBFC, we may have restricted access to funds in comparison to banks and deposit taking NBFCs as they are better rated. Our ability to compete effectively is dependent on our ability to maintain a low effective cost of funds. With the growth of our business, we are dependent on funding from the equity and debt markets and commercial borrowings. If we are unable to access funds at an effective cost that is comparable to or lower than our competitors, we may not be able to offer competitive interest rates for our loans to renewable energy projects. This is a significant challenge for us, as there are limits to the extent to which higher costs of funds can be passed on to borrowers, thus potentially affecting our net interest income. In addition, competition in the renewable energy sector may become more intense due to the increased interest in the sector among domestic and international banks and finance companies, and we may incur additional expenses relating to customer acquisition and retention, further reducing our operating margins.

6. We may be unable to secure funding on commercially acceptable terms and at competitive rates, which could adversely affect our business, results of operations and financial condition.

Our business is dependent upon our timely access to, and the costs associated with, our borrowings. Our borrowings primarily include secured and unsecured long-term bonds and secured and unsecured term loans obtained from various domestic and multilateral and bilateral institutions. Our ability to borrow on acceptable terms and at competitive rates depends on various factors including, our credit ratings, our capital adequacy ratios, foreign exchange rates, hedging cost and volatility in interest and exchange rates, the regulatory environment, liquidity in the markets, policy initiatives in India, developments in the international markets affecting the Indian economy and the perception of investors, and our current and future results of operations and financial condition.

Our ability to raise funds on acceptable terms, at competitive rates and in a timely manner, depends on various factors including our current and future results of operations and financial condition, our risk management policies, our credit ratings, our brand equity, the regulatory environment and policy initiatives in India and developments in the international markets affecting the Indian economy including the effects of events such as the COVID-19 pandemic. The cost of our borrowings may increase due to market volatility or changes in the risk premiums required by lenders or if traditional sources of debt capital are unavailable. Volatility or depressed valuations or trading prices in the equity markets may similarly adversely affect our ability to obtain equity financing. If we raise additional funds through further issuances of equity or convertible debt securities, our existing shareholders could suffer significant dilution.

A major factor that determines interest rates on our borrowings is our credit ratings. Our ability to raise further borrowings at attractive pricing in the form of bank loans or bond offerings in international markets may be adversely affected by any downgrade or change in outlook by rating agencies.

Any downgrade or negative credit rating reports could increase interest rates for our new borrowings and could adversely affect our ability to borrow in the future. To honour our lending commitments, therefore, we may be required to avail ourselves of loans at high costs, which may in turn affect our spread on loans and our financial condition. Furthermore, due to our nature and tenure of the loans, it may not be possible for us to pre-pay the existing loans by incurring additional indebtedness without payment of penalty and interest.

Furthermore, an increase in debt would lead to leveraging the balance sheet, thereby exerting pressure on the financial covenants that we are required to maintain under our various loan agreements. In such an event, we cannot assure you that we would continue to follow our loan agreements conditions in the future. Any future default under a loan agreement may further affect our availability of funding.

Unavailability of borrowings at commercially acceptable terms, or at all, may adversely affect our capacity to lend in the future and would therefore have an adverse effect on our business, results of operations and financial condition.

7. Projects and schemes for generating electricity and energy through renewable sources like solar, wind and small hydro have inherent risks and, to the extent they materialize, could adversely affect our business, results of operations and financial condition.

Our business mainly comprises financing of projects and schemes for the generation of energy like solar, wind, and small hydro through utilization of renewable sources of energy and projects involving energy efficiency and conservation measures. These projects and schemes carry technology as well as sector specific risks, some of which include:

- Political, regulatory, fiscal, monetary, legal actions and policies that may adversely affect the viability of projects to which we lend;
- the fact that renewable energy projects are intermittent, seasonal and prone to vagaries of nature;
- decrease in tariff for solar power;
- delays in the construction and operation of projects to which we lend;
- adverse changes in demand for, or the price of, energy generated or distributed by the projects to which we lend;
- the willingness and ability of off-takers (including DISCOMs) to pay for the energy produced by projects to which we lend;
- environmental challenges and changes in environmental regulations may result in time and cost overrun there by impacting the project viability;
- potential defaults under financing arrangements of project companies and their equity investors;
- failure of co-lenders with us under consortium lending arrangements to perform on their contractual obligations;
- failure of third parties such as contractors, sub-contractors and others to perform on their contractual obligations in respect of projects to which we lend;
- adverse changes in the supply chain;
- adverse changes in the commodity prices may impact the viability of projects;
- adverse changes in the overall economic environment in India;
- adverse fluctuations in interest rates or currency exchange rates;
- lack of infrastructural facilities for transmission of power from generating stations to DISCOMs; and
- economic, political, health and social instability or occurrences such as natural disasters, armed conflict, pandemics like COVID-19 and terrorist attacks, particularly where projects are located or in the markets they are intended to serve. These or other risks relating to the renewable energy projects we finance could materially adversely affect our business, results of operations and financial condition.

8. There are outstanding litigations against our Company and any adverse outcome in any of these litigations may have an adverse impact on our business, results of operations and financial condition.

Certain legal proceedings involving our Company are pending at different levels of adjudication before various courts, tribunals and authorities. In the event of adverse rulings in these proceedings or consequent levy of penalties, we may need to make payments or make provisions for future payments and which may increase expenses and current or contingent liabilities.

We cannot assure you that any of the outstanding litigation matters will be settled in our favour, or that no (additional) liability will arise out of these proceedings. Our Company is in the process of litigating these matters and based on the assessment in accordance with applicable accounting standard, our Company has presently not made provision for any of the pending legal proceedings. Further, such proceedings could divert management time and attention, and consume financial resources in their defence. In addition to the foregoing, we could also be adversely affected by complaints, claims or legal actions brought by persons, before various forums such as courts, tribunals, consumer forums or sector-specific or other regulatory authorities in the ordinary course or otherwise, in relation to our products and services, our technology and/or intellectual property, our branding or marketing efforts or campaigns or our policies or any other acts/omissions. Further, we may be subject to legal action by our employees and/or ex-employees in relation to alleged grievances such as termination of their employment with the Company. There can be no assurance that such complaints or claims will not result in investigations, enquiries or legal actions by any courts, tribunals or regulatory authorities against us.

9. Our level of indebtedness and the restrictive covenants in our borrowing agreements that we have with our lenders could adversely affect our ability to react to changes in our business environment, limit our flexibility in managing our business and maintaining the growth of our loan portfolio, which may in turn have a material adverse effect on our business, results of operations and financial condition.

A substantive portion of our funding is obtained through credit facilities and loans provided by bilateral and multilateral institutions and issuance of bonds. A high level of indebtedness could:

- in the event our cash flows do not increase in the same proportion, require us to dedicate a substantial portion of our cash flows from operations to payments in respect of our indebtedness, thereby reducing the availability of cash flow to fund our working capital requirements, capital expenditures and other general corporate

- expenditures;
- increase our vulnerability to adverse general economic and industry conditions;
- limit our flexibility in planning for, or reacting to, competition and/or changes in our business or industry;
- limit our ability to borrow additional funds; and
- place us at a competitive disadvantage relative to competitors that have less debt or greater financial resources.

There are restrictive covenants in agreements that we have entered into with our lenders. These restrictive covenants require us to obtain ratings for debt instruments, intimate and/or seek the prior permission of these lenders for various activities, including, among other things, affecting undertaking any merger, amalgamation, change in control of ownership, charge creation, utilizing loans for purposes other than those set out in the financing agreement, and raising further capital. Such financing agreements may also require us to comply with certain covenants and conditions such as maintaining certain financial ratios. We have, in the past, not been in compliance with covenants for our international lines of credit under our financing documents, including with the Asian Development Bank (“ADB”) in relation to maintenance of gross non-performing loan level. While we are in compliance as of the date of this Draft Red Herring Prospectus, there can be no assurance that we will be able to comply with such covenants in future. In connection with our borrowing from European Investment Bank, we have been in breach of a covenant requiring external credit rating to be maintained for our securities, which we have not had since requesting Moody’s and Fitch to withdraw their ratings upon redemption of our Masala Bonds in October 2022. As of the date of this Draft Red Herring Prospectus, we are in discussion with European Investment Bank to replace the relevant covenant with alternative financial covenants. We have obtained waiver from Agence Francaise De Developpement in respect of breaches of the credit-exposure ratio. In the event of any breach of any covenant contained in these financing agreements, we may be required to immediately repay our borrowings either in whole or in part, together with any related costs. Breach of covenants may lead to restrictions on further loan drawdowns. Further, financing arrangements also contain cross default provisions which could automatically trigger defaults under other financing arrangements. As of the date of this Draft Red Herring Prospectus, none of our lenders have issued any notice of default or required us to repay any part of our borrowings as a result of such breaches. Any failure to comply with these covenants in the future may constitute an event of default under the relevant loan agreements. Any or a combination of some or all of these factors may result in a failure to maintain the growth of our loan portfolio.

Any or a combination of some or all of these factors may result in a failure to maintain the growth of our loan portfolio or could result in a credit rating downgrade that could lead to difficulties in raising funds at competitive rate, each of which may in turn have a material adverse effect on our business, results of operations and financial condition.

10. Our business is entirely concentrated in, and dependent on, the Indian renewable energy sector, which in general has many challenges and effective addressing of these risks are key to the growth of the sector. If risks in the sector are not managed effectively, the sector growth will suffer, and our business and operations will in turn will also be adversely affected.

Our business is majorly concentrated in, and dependent on, the Indian renewable energy sector. GOI has a target of 500GW of Non-Fossil Fuel based installed capacity by 2030 and achieving net zero emission by 2070. The viability of the renewable energy sector is linked to a favourable policy framework and the related fiscal and financial incentives available thereunder. Reduction or withdrawal of these benefits may impact the sector adversely. In addition, issues relating to land acquisition, grid evacuation infrastructure, open access permission, grid management problem arising from the variable and intermittent nature of solar, wind and hydro power, tariff related uncertainties, prolonged project commissioning periods on account of delay in approvals from the state governments, large capital outlay, delay in payment to generators by DISCOMs, frequent policy changes can affect project viability during the implementation /operational stages, with negative impact on debt servicing capability of our borrowers and in turn will also adversely affect our business and operations.

11. The RBI prudential norms are applicable to us and if the level of non-performing assets in our loan portfolio were to increase, our business, results of operations and financial condition would be adversely affected.

In Fiscal 2019, the RBI withdrew the exemptions from their prudential norms which were previously available to all Government NBFCs ND SI vide their circular, dated May 31, 2018. As per the revised RBI norms, the NPA classification, as at March 31, 2019, provides that an NPA includes any loan asset that is in default for more than 120 days and, as at March 31, 2020, includes any loan asset that is in default for more than 90 days. The RBI pursuant to its updated circular, dated March 3, 2022, applicable to the NBFC-ND-SI sector, provides that an asset is to be classified as NPA if it is overdue for a period of three months or more.

In the past, our gross and net NPAs have been as follows:

	Gross NPAs as percentage of total loans	Net NPAs as percentage of total loans
As at March 31, 2024	2.36%	0.99%
As at March 31, 2023	3.21%	1.66%
As at March 31, 2022	5.21%	3.12%

The Company follows provision on the basis of expected credit loss (ECL) methodology as per the RBI circular. Accordingly, our impairment provisions on account of NPAs as at March 31, 2024, March 31, 2023 and March 31, 2022 were ₹82,964 lakhs, ₹74,533 lakhs, and ₹73,286 lakhs respectively.

12. The poor health of the State DISCOMs may lead to delays in payments to renewable energy projects that we finance. This poses a risk which may adversely affect the repayment capability of our borrowers.

The power off-take from the renewable energy projects is largely through long term power purchase agreements (“PPAs”) with the State DISCOMs. However, many of the DISCOMs in India are in poor financial health as noted in the Ministry of Power’s report entitled “State Distribution Utilities Ninth Annual Integrated Rating”, dated July 2021, where 23 out of 41 utilities have been assigned a rating of B or less, indicating “Below Average Operational and Financial Performance Capability”.

The financial problems experienced by the DISCOMs often results in delayed payments to the renewable energy power generators and irregular payment cycles of our renewable energy project borrowers. This may affect the repayment capability of our borrowers and in turn may adversely affect our business, results of operations and financial condition.

Furthermore, if such borrowers are unable to manage their cash flow and other financial risks applicable to such borrowers, our NPAs could increase which would also adversely affect our business, financial condition and results of operations.

13. Certain DISCOMs that purchase electricity from our borrowers and certain states have sought revision in the terms of their existing PPAs. A downward revision in the tariffs could negatively affect the cash flows and financial conditions of our borrowers and may affect their repayment capabilities.

Our borrowers could be negatively affected if DISCOMS or state governments, for any reason, become unable or unwilling to fulfil their related contractual obligations under their PPAs with our borrowers, refuse to accept delivery of power delivered under PPAs with our borrowers or otherwise terminate such PPAs prior to the expiration thereof. If such events occur, the cash flow and financial condition of such borrowers may be adversely affected with may impact their repayment of capabilities of our loans to them. Further, On July 7, 2019, the Government of Andhra Pradesh vide an order bearing no. GO RT No 63 (“Order”), constituted a High-Level Negotiation Committee to revisit and review PPAs for solar & wind projects in the state of Andhra Pradesh with a view to bring down the tariffs. Pursuant to the same, a letter dated July 12, 2019, was issued by Andhra Pradesh Distribution Company to the developers to reduce the quoted tariff to ₹2.43 per unit for wind projects for the pending bills, and ₹2.44 per unit for solar projects from the date of commissioning and threatened termination of the PPA in case of refusal of the developers to accede to such reduction (“Letter”). The developers challenged both the Order and the Letter in the High Court at Vijayawada. The High Court vide order dated September 24, 2019, set aside both the Order and the Letter. However, as an interim measure, until the issue of possibility of reduction of existing tariff is decided by the Andhra Pradesh Electricity Regulatory Commission (“APERC”), directed to honor the outstanding and future bills of the developers, and pay at an interim rate of ₹2.43 and ₹2.44 per unit for wind and solar projects, respectively. This order of the single judge had been challenged In an appeal filed by the developers. The Andhra Pradesh High Court during the hearing on March 15, 2022, set aside the earlier order setting the interim tariff of ₹2.44/kWh for solar power and ₹2.43/kWh for wind power and directed the Andhra Pradesh DISCOMs to make payment of all pending and future bills at the tariff mentioned in the PPAs within six weeks. Legal or regulatory disputes of this nature or an adverse outcome for our borrowers could result in deterioration in their receivables under the PPAs. If our borrowers do not receive payments as provided under their PPAs, they may not have sufficient cash flows to meet their repayment obligations towards us.

14. We are exposed to fluctuations in foreign exchange rates, which in turn could adversely affect our results of operation and financial condition.

As at March 31, 2024, March 31,2023, and March 31, 2022 we had foreign currency borrowings of ₹9,29,866 lakhs, ₹10,1,3292 lakhs, and ₹10,43,203 lakhs, respectively. We may seek to obtain additional foreign currency borrowings in the future. We are therefore affected by adverse movements in foreign exchange rates. In the past, the Indian Rupee has seen adverse movement against US\$, Euro and Japanese Yen, which has been significantly volatile. If the Rupee depreciates against the currencies in which we borrow in, it will result in a higher outflow in relation to the foreign currency denominated loan. Although we have hedged our foreign currency loan in accordance with our foreign exchange and derivatives risk management policy, our hedges may not cover sufficiently, or at all, an increase in foreign currency loans resulting from the depreciation of the rupee against such currencies. Volatility in foreign exchange rates could adversely affect our results of operations and financial condition.

We currently hold, and have in the past held, derivative contracts, including forward exchange contracts and interest rate swaps. We believe that these forward exchange contracts, and cross currency swaps, have the effect of reducing the volatility of our profit and reducing our exposure to foreign exchange and interest rate risk. If, in the future, foreign exchange rates or interest rates move contrary to our expectations, or if our risk management procedures prove to be inadequate, we could incur derivative-related or other charges and opportunity losses independent of the relative strength of our business, which could affect our results of operations and financial condition.

15. If we are unable to manage our growth effectively, our business, results of operations and financial condition could be adversely affected.

In Fiscal 2024, Fiscal 2023 and Fiscal 2022 our profit before tax was ₹1,68,524 lakhs, ₹1,13,925 lakhs, and ₹83,384 lakhs respectively, and our profit after tax was ₹1,25,223 lakhs, ₹86,463 lakhs and ₹63,353 lakhs respectively. Our loans (on a gross basis) outstanding increased from ₹33,93,061 lakhs as at March 31, 2022 to ₹59,69,811 lakhs as at March 31, 2024, at a CAGR of 32.64%. This business growth and future business growth could place significant demands on our operational, credit, financial and other internal risk controls. Rapid growth could expose us to a wide range of increased risks, including business risks, such as the possibility that some of our loans may become impaired faster than anticipated, as well as operational risks, fraud risks and regulatory and legal risks. Our growth may also exert pressure on our capital adequacy, making management of asset quality increasingly important. Our growth also increases the challenges involved in preserving and improving our internal administrative, technological and physical infrastructure. Addressing the challenges arising from our growth would put significant demands on our management and other resources.

Although we started our operations in 1987, our loans have been increasing, showing a CAGR of 32.64% over last three fiscal years. Accordingly, a part of our loan portfolio is relatively new and unseasoned.

We intend to grow our loan portfolio, income and profits by leveraging on inherent strengths towards providing loans at competitive rates, entering into consortium and/or co-financing with other lenders for financing large size renewable energy projects, by diversifying customer and financial portfolio and maintaining strong asset quality through continued focus on risk management among others. Further, to boost our equity base and net worth, the Government of India infused an additional capital of ₹1,50,000 lakhs on March 28, 2022 into our Company by way of a rights issue that was completed on March 31, 2022, which will enable us to pursue additional lending opportunities in the renewable energy sector. Further, IPO was successfully launched by issue of fresh equity shares of 40,31,64,706 numbers at Rs. 32 per share in November 2023 raising capital for Rs. 1,290 crores.

We cannot assure you that we will be able to sustain our growth or that we will be able to further expand our loan portfolio. As we grow and diversify, we may not be able to implement, manage or execute our strategy efficiently in a timely manner or at all, which could adversely affect our business, results of operations and financial condition.

16. We are subject to capital adequacy requirements and other requirements imposed by the RBI. Any failure to meet these requirements or any change by the RBI in the regulatory regime for Government NBFCs, may adversely affect our business, results of operations and financial condition.

We are a non-deposit taking Government owned NBFC, and we are required to maintain a CRAR 13% as on March 31, 2021 and 15% by March 31, 2022. Our CRAR was 20.11% as at March 31, 2024.

The RBI continues to prescribe higher risk weights to unrated loan exposure to Banks than NBFCs. If the RBI prescribes such a requirement of higher risk weights on a NBFC like us, it will have significant impact on Tier 1 capital requirements. If we continue to grow our loan portfolio and asset base, we will be required to raise additional Tier 1 capital to continue to meet applicable capital adequacy ratios. Any equity financing or other Tier 1 financing, if available at all, may be on terms that may not be favourable to us.

There may be future changes in the regulatory system or in the enforcement of the laws and regulations, including policies or regulations or legal interpretations of existing regulations, relating to or affecting interest rates, taxation, inflation or exchange controls that could have an adverse effect on non-deposit taking NBFCs. In addition, we are required to make various filings with the RBI, the RoC and other relevant authorities pursuant to the provisions of the RBI regulations, Companies Act and other regulations. If we fail to comply with these requirements, or a regulator claims we have not complied with such requirements, we may be subject to penalties. Moreover, these laws and regulations can be amended, supplemented or changed at any time such that we may be required to restructure our activities and incur additional expenses in complying with such laws and regulations, which could materially and adversely affect our business. In addition, any historical or future failure to comply with the terms and conditions of our existing regulatory or statutory approvals may cause us to lose or become unable to renew such approvals.

In addition, the RBI conducts periodic on-site inspections on matters relating to, among other things, our portfolio, risk management systems, credit concentration risk, counterparty credit risk, internal controls, credit allocation,

systems and information technology infrastructure and regulatory compliance. Any significant deficiencies identified by the RBI that we are unable to rectify to the RBI's satisfaction could lead to sanctions and penalties imposed by the RBI, as well as expose us to increased business and credit risks.

17. We may fail to obtain certain regulatory approvals in the ordinary course of our business in a timely manner or at all, or to comply with the terms and conditions of our existing regulatory approvals and licenses which may have a material adverse effect on the continuity of our business and may impede our effective operations in the future. In addition, our business is subject to periodic inspections by the RBI, and our non-compliance with observations made by the RBI during these inspections could expose us to penalties and restrictions.

We may require certain new regulatory approvals, sanctions, licenses, registrations and permissions for operating and expanding our business. We may not receive or be able to renew such approvals in the time frames anticipated by us, or at all, which could adversely affect our business. If we do not receive, renew or maintain the regulatory approvals required to operate our business in a timely manner or at all, we may be subjected to sanctions and penalties pursuant to inspection and supervision by regulatory authorities, including the RBI and it may have a material adverse effect on the continuity of our business and may impede our effective operations in the future.

In addition to the numerous conditions required for the registration as an NBFC with the RBI, we are required to maintain certain statutory and regulatory permits and approvals for our business. In the future, we will be required to renew such permits and approvals and obtain new permits and approvals for any proposed operations. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time frame anticipated by us, or at all. Failure by us to renew, maintain or obtain the required permits or approvals may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and results of operations.

The RBI conducts periodic on-site inspections on all matters addressing our operations as a NBFC and relating to, among other things, our portfolio, risk management systems, credit concentration risk, internal controls, credit allocation and regulatory compliance. During the course of finalizing this inspection, the RBI inspection team shares its findings and recommendations with us and provides us an opportunity to provide clarifications, additional information and, where necessary, justification for a different position, if any, then that observed by the RBI. The RBI incorporates such findings in its final inspection report and, upon final determination by the RBI of the inspection results, we are required to take actions specified therein by the RBI to its satisfaction, including, without limitation, requiring us to make provisions, impose internal limits on lending to certain sectors and tighten controls and compliance measures and restricting our lending and investment activities. Any significant deficiencies identified by the RBI that we are unable to rectify to the RBI's satisfaction could lead to sanctions and penalties imposed by the RBI, as well as expose us to increased risks.

Any failure to meet regulatory requirements could materially and adversely affect our reputation, business, financial condition, cash flows, results of operations, pending applications or requests with the regulators and our ability to obtain the regulatory permits and approvals required to expand our business.

18. We operate a 50 MW solar project in Kerala which may be subject to tariff changes by Kerala State Electricity Regulatory Commission (KSERC) which may adversely affect the financial viability of the project.

We were the developer, and we are now the operator, of a 50 MW Solar Photovoltaic Project in Kasaragod Solar Park in the state of Kerala (the "Project"). The project was commissioned in September 2017. We entered into a power sale agreement dated March 31, 2017, with the Kerala State Electricity Board Limited for the Project, which had set the tariff rate at ₹4.95 per unit, or the rate approved by the KSERC, whichever is lower. However, the KSERC passed an order dated February 6, 2019, for the tariff to be set at ₹3.83 per unit, and, accordingly, the power generation revenue for the Project has been accounted for at this rate since Fiscal 2018 resulting in loss of revenue for our Company due to lowering of the tariff rate. Our Company filed an appeal before the Appellate Tribunal for Electricity ("APTEL") against the order passed by KSERC which was subsequently disposed off by APTEL. Subsequently, our Company approached the APTEL with a review petition against its order and also filed an appeal with the Supreme Court. As of the date of this Draft Red Herring Prospectus, both the review petition before APTEL and the appeal before the Supreme Court remain pending.

Any further downward revision of the tariff rates by the KSERC may adversely affect the financial viability of the Project. There may be variation in solar power generation as well as interruption in operation of the Project for reasons outside our control which may lead to revenue loss.

Set forth below are details of revenues generated from the Project:

Particulars	As of/ For the Year Ended March 31,		
	2022	2023	2024
Revenue generated from the Project (₹ lakhs)	2849	2690	2921
Revenue generated from the Project, as a percentage of total income (%)	0.99%	0.77%	0.59%

19. We may face asset-liability mismatches that could adversely affect our cash flows, financial condition and results of operations.

In past, our funding requirements primarily have been met through a combination of equity investments by the Government, the issuance of secured and unsecured non-convertible debentures and unsecured and secured long-term loans made available from domestic as well as multilateral and bilateral institutions. We may face liquidity risks due to mismatches in the maturity of our assets and liabilities. If we are unable to effectively manage our funding requirement and the financing we provide (which may be aggravated if our borrowers are unable to repay any of the financing facilities, we grant to them or if we are unable to obtain additional credit facilities in a timely and cost-effective manner, or at all), we may have mismatches in our assets and liabilities, which in turn may adversely affect our liquidity, results of operations and financial condition.

20. Our borrowers that relied upon Renewable Energy Certificates (RECs) as part of their project cash flow and financial models may experience financial and cash flow issues as the market for RECs has not been realized as originally expected.

Renewable Purchase Obligations (RPOs) are the obligation imposed by the Electricity Act, 2003 on the State DISCOMs and other large consumers of power to either buy electricity generated by specified renewable energy sources, or buy, in lieu of that, renewable energy certificates (“RECs”) from the market. RECs are issued to companies that produce power from renewable power and to the eligible distribution licensee.

The Central Electricity Regulatory Commission (CERC) has taken a position that it does not have the jurisdiction to enforce the RPOs in the States and that the responsibility of setting RPO targets and implementation rests with the State Electricity Regulatory Commissions (SERCs). To date, some of the SERCs have not enforced RPOs. Furthermore, the market for RECs has not been matured as originally expected when the legislation was adopted. As a result, some of our borrowers that relied upon RECs as part of their project cash flow and financial models may experience cash flow shortfalls and other financial issues which in turn could increase our NPAs and adversely affect our business, results of operations and financial condition. However, revenue from REC sales has resumed, post the recent order of the Appellate Tribunal for Electricity’s (APTEL) to resume REC trading from November 24, 2021 after a ban on REC trading since July 2020.

21. Our Company as well as our borrowers are required to comply with Government Policies in relation to our business. If we fail to comply with these policies or if we or our clients are required to comply with new or additional regulations or guidelines requiring reorganizing or restructuring, there may be an adverse effect on our business, results of operations and financial condition.

We are a ‘Government Company’ under Section 2(45) of the Companies Act, 2013, and majorly owned by the Promoter. Our business and our sector depend, directly and indirectly, on the policies and support of the Government in many significant ways, including with respect to the cost of our capital, the financial strength of our borrowers, the management and growth of our business and our sector. Like any other public sector undertaking, the Government can influence key decisions about our Company, including with respect to the appointment and removal of members of our Board. We are required to follow the public policy directives of the Government by concentrating our financing on specific projects or sectors in the public interest.

Our borrowers are significantly impacted by the Government policies and support in a variety of ways. In particular, the Government has in the past made sustained increases to budgetary allocations towards projects and schemes generating energy through non-conventional and renewable material to encourage greater private sector participation. Since governmental entities are responsible for awarding concessions and maintenance contracts and are parties to the development and operation of such renewable energy projects, any withdrawal of support or adverse changes in their policies may lead to our financing agreements being restructured or renegotiated and could adversely affect our business, results of operations and financial condition.

22. If we fail to identify, monitor and manage risks and effectively implement our risk management policies, it could have a material adverse effect on our business, financial condition and results of operations.

We believe we have developed comprehensive risk management policies and procedures. We place importance to

actively managing and controlling our risk exposures. These processes include a detailed appraisal methodology, identification of risks and suitable structuring of credit risk mitigation measures. We have set up a Risk Management Committee to monitor various risks, examine risk management policies and practices and initiate action for mitigation of risks relating to our operations. Despite this, our policies and procedures to identify, monitor and manage risks may not be fully effective. Some of our risk management systems are not automated and are subject to human error. Some of our methods of managing risks are based upon the use of observed historical market behaviour. As a result, these methods may not be able to predict future risk exposures, which could be significantly greater than those indicated by the historical measures.

To the extent any of the instruments and strategies we use to hedge or otherwise manage our exposure to market or credit risk are not effective, we may not be able to mitigate effectively our risk exposures in particular market environments or against particular types of risk. Further, some of our risk management strategies may not be effective in a difficult or less liquid market environment, where other market participants may be attempting to use the same or similar strategies to deal with the difficult market conditions. In such circumstances, it may be difficult for us to reduce our risk positions due to the activity of such other market participants. Other risk management methods depend upon an evaluation of information regarding markets, clients or other matters. This information may not in all cases be accurate, complete, up-to-date or properly evaluated. To the extent our assessments, assumptions or estimates prove inaccurate or not predictive of actual results, we could suffer higher than anticipated losses.

If we fail to effectively implement our risk management policies, it could materially and adversely affect our business, financial condition, results of operations and cash flows.

23. The success of our business depends on our ability to attract and retain our senior management and high-quality employees, and the loss of their services could have a material adverse effect on our business, results of operations and financial condition.

The success of our business to a large extent depends on the continued service of our senior management and various professionals and specialists, including information technology specialists, finance professionals, legal professionals and risk management specialists. Our senior and middle management personnel have significant experience and in-depth industry knowledge and expertise. As a result of ever-increasing market competition in the financial sector, the market demand and competition for experienced management personnel and finance professionals and specialists has intensified. We face a challenge to recruit and retain skilled personnel knowledgeable in the renewable energy sector to which we lend. Our business and financial condition could suffer if we are unable to retain our senior management, or other high-quality personnel, or cannot adequately and timely replace them upon their departure.

24. Our Company continues to be controlled by the Promoter.

The Promoter holds majority of the paid-up Equity Share capital of our Company. Consequently, the Promoter acting through the MNRE will continue to control us and will have the power to elect and remove the Directors and therefore determine the outcome of most proposals for corporate action requiring approval of the Board or the shareholders, including with respect to the payment of dividends, preparation of budgets, capital expenditure, and transactions with other public sector companies. We continue to be a public sector undertaking under the Companies Act, and the GoI may issue directives with respect to the conduct of our business or its affairs or change in control or impose other restrictions in terms of our Articles of Association.

25. The interests of the Promoter as our controlling shareholder may conflict with the interests of other shareholders.

Under our Articles of Association, the Promoter, by holding a majority of our Equity Share capital may issue directives with respect to the conduct of our business or our affairs for as long as we remain a government company, as defined under the Companies Act. The interests of the Promoter may be different from our interests or the interests of other shareholders. As a result, the Promoter may take actions with respect to our business and the businesses of our peers and competitors, designed to serve the public interest in India and not necessarily to maximize profits. In addition, as a result of our controlling ownership by the Promoter, we are required to adhere to certain restrictions with respect to the types of investments we may make using our cash balances, which may restrict us from entering into certain investments providing a higher rate of return. The Promoter will retain control over the decisions requiring adoption by our shareholders and could exercise its powers of control, delay or defer or initiate a change of control of our Company or a change in our capital structure, delay or defer a merger, consolidation, or discourage a merger with another public sector undertaking.

A. EXTERNAL RISKS

1. Any downturn in the macroeconomic environment in India could adversely affect our business, results of operations and financial condition.

We are incorporated in India and all of our funded projects, and companies to which we have extended borrowings are located in India. As a result, our results of operations and financial condition are significantly affected by factors influencing the Indian economy. Any slowdown in economic growth in India could adversely affect us, including our ability to grow our asset portfolio, the quality of our assets and our ability to implement our strategy. In addition, an increase in India's trade deficit, a downgrading in India's sovereign debt rating or a decline in India's foreign exchange reserves could increase interest rates and adversely affect liquidity, which could adversely affect the Indian economy and our business, results of operations and financial condition.

2. *Recent global economic conditions have been unprecedented and challenging and continue to affect the Indian market, which may adversely affect our business, results of operations and financial condition.*

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located in other countries, including India. Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general.

A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy, including the movement of exchange rates and interest rates in India. Any of these factors could depress economic activity and restrict our access to capital, which could have a material adverse effect on our business, results of operations and financial condition and reduce the price of our equity shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our equity shares.

3. *Difficulties faced by other financial institutions or the Indian financial sector generally could adversely affect us.*

We are exposed to the risks of the Indian financial system, which may be affected by the financial difficulties faced by certain Indian financial institutions because the commercial soundness of many financial institutions may be closely related as a result of credit, trading, clearing or other relationships. This risk, which is referred to as "systemic risk", may adversely affect financial intermediaries, such as clearing agencies, banks, securities firms and exchanges with whom we interact on a daily basis. Our transactions with these financial institutions expose us to credit risk in the event of default by the counterparty, which can be exacerbated during periods of market illiquidity. The problems faced by individual Indian financial institutions and any instability in or difficulties faced by the Indian financial system generally could create adverse market perception about Indian financial institutions. This in turn could adversely affect our business, results of operations and financial condition.

4. *Any downgrade of credit ratings of India may adversely affect our ability to raise debt financing. India's sovereign ratings reflect an assessment of the Indian government's overall financial capacity to pay its obligations and its ability or willingness to meet its financial commitments as they become due.*

No assurance can be given that any statistical rating organization will not downgrade the credit ratings of India. Any such downgrade could adversely affect our ability to raise additional financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our business and financial performance.

5. *A decline in India's foreign exchange reserves may affect liquidity and interest rates in the Indian economy, which could adversely impact our financial condition.*

Flows to foreign exchange reserves can be volatile, and past declines may have adversely affected the valuation of the Rupee. Further declines in foreign exchange reserves, as well as other factors, could adversely affect the valuation of the Rupee and could result in reduced liquidity and higher interest rates that could adversely affect our future financial performance and the market price of the equity shares.

6. *Our ability to raise foreign capital may be constrained by Indian law, which may adversely affect our business, financial condition, cash flows and results of operations.*

As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies. Such regulatory restrictions limit our financing sources and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, if at all. Limitations on raising foreign debt may have an adverse effect on our business, financial condition, cash flows and results of operations.

7. *If there is any change in tax laws or regulations, or their interpretation, such changes may significantly affect our financial statements for the current and future years, which may have a material adverse effect on our financial position, business, and results of operations.*

Any change in tax laws, including for indirect taxes, may result in us no longer being able to enjoy the existing exemptions/benefits, available to us, which could adversely impact our profitability. If there is an upward revision to the currently applicable special corporate tax rates, our tax burden will increase. Other benefits such as inapplicability of minimum alternate tax rates, as applicable to other corporates, exemption for income earned by way of dividend from investments in other domestic companies and units of mutual funds.

8. *Communal disturbances, riots, terrorist attacks, other acts of violence or war involving India and/or other countries, health epidemics and natural calamities or similar events that are beyond our control could adversely affect India's economy and the financial markets, result in loss of client confidence, and adversely affect the price of our equity shares, our business results of operations and financial condition.*

India has experienced communal disturbances, terrorist attacks and riots during recent years. Any major hostilities or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business and may adversely affect the Indian stock markets where our equity shares will trade as well as global equity markets generally. Such acts could negatively impact business sentiment and consumer confidence, which could adversely affect our business and results of operations.

India and other countries may enter armed conflict or war with other countries or extend pre-existing hostilities. Military activity or terrorist attacks could adversely affect the Indian economy by, for example, disrupting communications and making travel more difficult. Such events could also create a perception that investments in Indian companies involve a higher degree of risk. This could adversely affect client confidence in India, which could have a negative impact on the economies of India and other countries, on the markets for our products and services and on our business.

9. *Natural disasters, acts of war, political unrest, epidemics, terrorist attacks or other events which are beyond our control, may cause damage, loss or disruption to our business and have an adverse impact on our business, financial condition, results of operations and growth prospects.*

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19, acts of war, terrorist attacks and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition and results of operations. Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations. Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India or countries to whom we export our products could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the equity shares. A number of countries in Asia, including India, as well as countries in other parts of the world, are susceptible to contagious diseases and, for example, have had confirmed cases of diseases such as the highly pathogenic H7N9, H5N1 and H1N1 strains of influenza in birds and swine and more recently, the COVID-19 virus. A worsening of the current outbreak of COVID-19 pandemic or future outbreaks of COVID-19 virus or a similar contagious disease could adversely affect the Indian economy and economic activity in the region. As a result, any present or future outbreak of a contagious disease could have a material adverse effect on our business.

10. *India has also experienced natural calamities such as earthquakes, floods, drought and a tsunami in the recent past. The length and severity of these natural disasters determine the extent of their impact on the Indian economy. Prolonged spells of abnormal rainfall and other natural calamities could have an adverse impact on the Indian economy.*

Such events could have a material adverse effect on the market for securities of Indian companies, including the equity shares, and adversely affect our business, results of operations and financial condition.

B. RISKS RELATING TO INVESTMENT IN THE BONDS

11. *There is no guarantee that the Bonds issued pursuant to this Issue will be listed on NSE and BSE in a timely manner, or at all.*

In accordance with Indian law and practice, permissions for listing and trading of the Bonds issued pursuant to this Issue will not be granted until the relevant stock exchanges as well as SEBI approve of the listing, which will be available only after an updated document is accordingly filed with the relevant authorities at the time of such listing. Approval for listing and trading will require all relevant documents authorizing the issuing of Bonds to be submitted. There could be a failure

or delay in listing the Bonds on the NSE and/or BSE. If permission to deal in and for an official quotation of the Bonds is not granted by the Stock Exchanges, the Bonds will remain unlisted.

12. *There has been only a limited trading in the Bonds of such nature and the same may not develop in future, therefore the price of the Bonds may be volatile.*

There has been only a limited trading in bonds of such nature in the past. Although the Bonds shall be listed on NSE and BSE, there can be no assurance that a public market for these Bonds would be available on a sustained basis. The liquidity and market prices of the Bonds can be expected to vary with changes in market and economic conditions, our financial condition and prospects and other factors that generally influence market price of Bonds. Such fluctuations may significantly affect the liquidity and market price of the Bonds, which may trade at a discount to the price at which the Bonds are being issued.

Further, the price of our Bonds may fluctuate after this Issue due to a wide variety of factors, including:

- Changes in the prevailing interstate;
- Volatility in the Indian and global securities markets;
- Our operational performance, financial results and our ability to expand our business;
- Developments in India's economic liberalization and deregulation policies;
- Changes in India's laws and regulations impacting our business;
- Changes in securities analysts' recommendations or the failure to meet the expectations of securities analysts;
- The entrance of new competitors and their positions in the market; and
- Announcements by our Company of its financial results.

We cannot assure that an active trading market for our Bonds will be sustained after this Issue, or that the price at which our Bonds are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue.

13. *Foreign Investors, including Eligible NRIs, FIIs and Eligible QFIs subscribing to the Bonds are subject to risks in connection with (i) exchange control regulations, and, (ii) fluctuations in foreign exchange rates.*

The Bonds will be denominated in Indian rupees and the payment of interest and redemption amount shall be made in Indian rupees. Various statutory and regulatory requirements and restrictions apply in connection with the Bonds held by Eligible NRIs, FIIs and Eligible QFIs ("Exchange Control Regulations"). Amounts payable to Eligible NRIs, FIIs and Eligible QFIs holding the Bonds, on redemption of the Bonds and/or the interest paid/payable in connection with such Bonds or the amount payable on enforcement of security would accordingly be subject to prevailing Exchange Control Regulations in case of applicants who have invested on repatriation basis.

Any change in the Exchange Control Regulations may adversely affect the ability of such Eligible NRIs, FIIs and Eligible QFIs to convert such amounts into other currencies, in a timely manner or at all. Further, fluctuations in the exchange rates between the Indian rupee and other currencies could adversely affect the amounts realized by Eligible NRIs, FIIs and Eligible QFIs on redemption or payment of interest on the Bonds by us.

14. *Investor may not be able to recover, on a timely basis or at all, the full value of the outstanding amounts and/or the interest accrued thereon in connection with the Bonds.*

Our ability to pay interest accrued on the Bonds and/or the principal amount outstanding from time to time in connection therewith would be subject to various factors, including our financial condition, profitability and the general economic conditions in India and the global financial markets. We cannot assure you that we would be able to repay the principal amount outstanding from time to time on the Bonds and/or the interest accrued thereon in a timely manner, or at all.

15. *Changes in prevailing interest rates may affect the price of the Bonds.*

All securities where a fixed rate of interest is offered, such as the Bonds, are subject to price risk. The price of such securities will vary inversely with changes in prevailing interest rates, i.e., when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon rate, days to maturity and the increase or decrease in the level of prevailing interest rates. Increased rates of interest, which frequently accompany inflation and/or a growing economy, are likely to have a negative effect on the trading price of the Bonds.

16. *Legal investment considerations may restrict certain investments*

The investment activities of certain investors are subject to investment laws and regulations, or review or regulation by certain authorities. Each potential investor should consult its legal advisers to determine whether and to what extent (i) the Bonds are legal investments for it, (ii) the Bonds can be used as collateral for various types of borrowing and (iii) other

restrictions apply to its purchase or pledge of Bonds.

17. The Bonds are subject to the risk of change in-law.

The terms and conditions of the Bonds are based on Indian law in effect as of the date of issue of the relevant Bonds. No assurance can be given as to the impact of any possible judicial decision or change to Indian law or administrative practice after the date of issue of the relevant Bonds and any such change could materially and adversely impact the value of any Bonds affected by it.

18. No debenture redemption reserve will be created for the Bonds issued under this issue since as per Companies (Share Capital & Debentures) Rules, 2014, as amended (“Debentures Rules”), or NBFC’s registered with the RBI under Section 45-1A of the RBI (Amendment) Act, 1997, no DRR is required in the case of privately placed debenture.

According to the Companies (Share Capital and Debentures) Rules, 2014, or NBFCs registered with the RBI under Section 45-1A of the RBI (Amendment) Act, 1997 no DRR is required in case of privately placed debentures. Therefore, creation of DRR is not envisaged against the Bonds being issued under the terms of this General Information Document (GID).

19. There may be other changes to the regulatory framework that could adversely affect the Issuer.

The Issuer is under the administrative control of the MNRE and a number of the Issuer’s activities are subject to supervision and regulation by statutory authorities including the RBI, the SEBI and IRDA. The Issuer is also subject to policies/procedures of GoI departments such as the MoF, MCA and DPE. In addition, the Issuer’s borrowers in the power sector are subject to supervision and regulation by the CEA, CERC and SERCs. Furthermore, the Issuer is subject to changes in Indian law as well as to changes in regulation and Government policies and accounting principles. The Issuer is receiving certain benefits and takes advantage of certain exemptions available to it as a public financial institution under Section 2(72) of the Companies Act, 2013 and as a systemically important non- deposit taking NBFC that are also IFCs under the RBI Act.

20. Direct capital market access by the Issuer’s borrowers could adversely affect the Issuer.

The Indian capital markets are developing and maturing and, as such, there may be a shift in the pattern of power sector financing. Financially stronger SPUs might source their fund requirement directly from the market. The Issuer has large exposure to SPUs and such changes may have an adverse impact on the business, financial condition and results of operations.

21. Companies operating in India are subject to a variety of Central and state Government taxes and surcharges.

Tax and other levies imposed by the Central and State Governments in India that affect the tax liability of the Corporation include Central and state taxes and other levies including income tax, GST, stamp duty and other special taxes surcharges etc. These taxes are extensive and subject to change from time to time. Any amendments may affect the overall tax liability of Companies operating in India and result in significant additional taxes becoming payable. Additional tax exposure could adversely affect the business and results of operations.

C- RISKS RELATING TO INVESTMENT IN THE BONDS UNDER A SERIES WHICH FORMS PART OF NON-EQUITY REGULATORY CAPITAL

1- Pursuant to the NBFC Directions the following terms and conditions are applicable to perpetual debt instruments:

- (i) The maturity period of Bonds issued in the form of perpetual debt instruments shall be perpetual.
- (ii) The Issuer is required to issue Bonds issued in the form of perpetual debt instruments only as a plain vanilla instrument. However, the Issuer is permitted to exercise a call option subject to strict compliance with each of the following conditions:
 - (a) That these Bonds have run for a minimum period of 10 (Ten) years from their deemed date of allotment; and
 - (b) The call option shall be exercised only with the prior approval of RBI. While considering the proposals for exercising the call option the RBI would, among other things, take into consideration the ‘capital to risk assets ratio’ (“CRAR”) position of the Issuer both at the time of exercise of the call option and after the exercise of the call option.

(iii) The Bonds issued in the form of perpetual debt instruments shall be subjected to a lock-in clause pursuant to which the Issuer may defer the payment of coupon, if:

- (a) the CRAR of the Issuer is below the minimum regulatory requirement prescribed by RBI; or
- (b) the impact of such payment results in CRAR of the Issuer falling below or remaining below the minimum regulatory requirement prescribed by RBI.

(iv) In the event that making of any coupon payment by the Issuer may result in net loss or increase the net loss of the Issuer, the making of such of coupon payment by the Issuer shall be subject to the prior approval of the RBI and shall be made on receipt of such approval provided that the CRAR remains above the regulatory norm after the making of such payment.

(v) The coupon on the Bonds issued in the form of perpetual debt instruments shall not be cumulative except in cases as in 1 (iii) above.

- (vi) The claims of the Bondholders of the Bonds issued in the form of perpetual debt instruments shall be:
- (a) superior to the claims of the holders of the equity shares issued by the Issuer; and
 - (b) subordinated to the claims of all other creditors of the Issuer.

(vii) The Bonds shall be fully paid up, unsecured and free of any restrictive clauses.

2. The tenure of the Bonds issued in the form of perpetual debt instruments will be perpetual in nature. However, the Bonds will have a call option exercisable on a call option date, which may be exercised by the Issuer subject to receipt of prior approval of the RBI. The Bonds will be otherwise perpetual in nature and shall not be redeemed. Please note that the investors may make investment decision on the basis of their own analysis and the RBI does not accept any responsibility about repayment of such investment.

3. Bonds issued in the form of perpetual debt instruments are characterized by the SEBI as 'non-equity regulatory capital'. In this respect, SEBI has specified certain requirements in respect of the type of investors and the face value of Bonds as well as disclosure requirements. Investors are requested to note that, as on the date of this General Information Memorandum: (i) only QIBs are permitted investor classes, and (ii) the face value of these Bonds Rs 1 Crore. The relevant Key Information Document shall contain the disclosures (including the details of the call option) as required under applicable law in respect of the Bonds issued in the form of perpetual debt instruments.

Income Tax

This pertains to Income Tax cases for AY 2014-15 and AY 2020-21 which are pending before the CIT(Appeals), while case for AY 2022-23 has been moved for rectification under Section 154 of the Income Tax Act. The Company is hopeful of a favourable outcome in respect of the various issues covered under the appeal and thus except for the issues decided against the Company in other years, for which reasonable provision has been made, no further provision has been considered as necessary.

For the Income Tax Cases of AY 2010-11 to AY 2018-19 (except AY 2014-15, which is pending before CIT(A)), the Company has received orders dated 22.03.2024 passed by CIT(A), wherein the appeal has been partially allowed. Pending the receipt of the order for appeal effect, the Company has provided ₹ 1,479.60 Lakhs (previous year: Nil) for matters not allowed in the favour of the Company and balance demand, although not finally determined, is not considered as a contingent liability as no outflow is considered probable for the items allowed. Any adjustment shall be accounted for upon receipt of the respective orders. Further, the Company has an option to appeal to higher authorities within the prescribed timelines for matters not allowed.

For the Income Tax Cases of earlier years (AY 1998-99 – AY 2009-10), the Hon'ble High Court of Delhi decided the WRIT petition in favour of the Company vide order dated 08.12.2023 and pronounced that the assessment proceedings concerning from AY 1998-99 to AY 2009-10, pursuant to the orders of the Tribunal dated 21.11.2014 and 29.05.2015, have become time-barred and thus directed the A.O. to accept the returned income and pass the consequential orders. Such consequential orders are awaited and any adjustments shall be accounted for upon receipt of the respective orders.

Service Tax and Goods & Service Tax (GST) cases

The Company had received a Notice of Demand/Order from the Commissioner, Adjudication, Central Tax, GST Delhi East dated 15.03.2022 creating demands on the Company amounting to ₹ 11,709.11 Lakhs (excluding applicable interest) for financial year 2012-13 to 2015-16. Although the Company contends that entire demand is barred by limitation, it has provided for ₹ 1,248.39 Lakhs (previous year: ₹ 1,174.80 Lakhs) including interest on conservative basis. Based on law and facts in the matter, Service Tax demand (including interest) of ₹ 22,995.18 Lakhs (previous year: ₹ 21,492.48 Lakhs) has been disclosed as contingent liability. Further, since the Company is a government enterprise, no mala fide intention can be attributed to it and thus, extended period of limitation ought not to be invoked based on certain decisions of Hon'ble Supreme Court in such cases and hence the penalty has not been considered for disclosure as a contingent liability. The Company has filed an appeal with CESTAT, New Delhi on 15.06.2022 in the matter and the same is pending.

The Company had received order dated 25.03.2022 from the office of Additional Director General (Adjudication) on recovery of Service Tax on Guarantee Fee Paid to Government under Reverse Charge basis for the period April 2016 to June 2017 raising a demand of ₹ 2,072.89 Lakhs towards Tax, ₹ 2,072.89 Lakhs towards penalty and applicable interest thereon. While the Company had filed an appeal against the same before the Hon'ble CESTAT, Mumbai on 24.06.2022, it has made requisite provision towards the Tax and interest thereon amounting to ₹ 6,309.78 Lakhs (previous

year: ₹ 5,683.73 Lakhs) and penalty amount of ₹ 2,072.89 Lakhs (previous year: ₹ Nil Lakhs) has been disclosed as contingent liability.

The Company has received order dated 31.01.24 from the office of Commissioner of Central Tax Appeals -1, Delhi, vide which the appeal filed by the Company against recovery of GST on Guarantee Fee Paid to Government under Reverse Charge basis for the period 01.07.2017 To 26.07.2018 has been rejected. While the Company is in the process of filing appeal with the GST Appellate Tribunal, it has paid the Tax amount of ₹ 1,327.87 Lakhs under protest and made requisite provision towards Tax and interest thereon amounting to ₹ 2,895.75 Lakhs (previous year: ₹ 2,627.98 Lakhs). The penalty amount of ₹ 1,525.58 Lakhs (previous year: ₹ Nil Lakhs) has been disclosed as contingent liability.

³Includes penalty for ₹ 2.62 Lakhs (previous year: ₹ 2.62 Lakhs) imposed by Ministry of Corporate Affairs (MCA) w.r.t. non-appointment of Woman Director. SECTION XIX CREDIT RATING & RATIONALE THEREOF

India Rating and Research Private Limited vide rating letter dated May 27, 2024, has provided credit rating of “IND AAA/Stable” to the Debentures. Instruments with this rating are considered to have the highest degree of safety regarding timely servicing of financial obligations. Such instruments carry the lowest credit risk. A copy of rating letter from India Rating and Research Private Limited is enclosed as Annexure II in this General Information Document.

ICRA Limited vide letters dated April 30, 2024 and rationale dated May 8, 2024, has provided credit rating of “[ICRA] AAA (Stable)” to the Debentures. Instruments with this rating are considered to have the highest degree of safety regarding timely servicing of financial obligations. Such instruments carry the lowest credit risk. A copy of rating letter from India Rating and Research Private Limited is enclosed as Annexure II in this General Information Document.

Other than the credit ratings mentioned hereinabove, Issuer has not sought any other credit rating from any other Credit Rating Agency(ies) for the Debentures offered for subscription under the terms of this General Information Document.

For detailed credit rating rationale and latest press release please refer to the Annexure II as attached.

The above ratings are not a recommendation to buy, sell or hold securities and Investors should take their own decision. The ratings may be subject to revision or withdrawal at any time by the Credit Rating Agencies and each rating should be evaluated independently of any other rating. The ratings obtained are subject to revision at any point of time in the future. The Credit Rating Agencies have the right to suspend, withdraw the rating at any time on the basis of new information etc.

The Issuer declares that the credit ratings provided by the rating agencies shall be valid on the date of issuance and listing of the Debentures. Also, the press release/rating rationale shall not be older than one year on the date of opening of the Issue.

SEBI Registration No.: IND000000569

Consent letter bearing reference no. 51170/CL/MUM/24-25/DEB/25 dated 30th April, 2024 conveying their consent to act as Debenture Trustee for the current issue of Debentures, is enclosed as Annexure I in this General Information Document.

Issuer hereby undertakes that the rights of the Debenture Holder(s) will be protected as per the agreement/deed executed/to be executed between Issuer and the Debenture Trustee. The Debenture Trustee Agreement/Deed shall contain such clauses as may be prescribed under Section 71 of the Companies Act, 2013, Companies (Share Capital and Debentures) Rules, 2014 and those mentioned in Schedule IV of the Securities and Exchange Board of India (Debenture Trustees) Regulations, 1993. Further, the Debenture Trustee Agreement/Debenture Trust Deed shall not contain any clause which has the effect of (i) limiting or extinguishing the obligations and liabilities of the Debenture Trustee or Issuer in relation to any rights or interests of the Debenture Holder(s); (ii) limiting or restricting or waiving the provisions of the SEBI Act; SEBI NCS Regulations and circulars or guidelines issued by SEBI; and (iii) indemnifying the Trustees or Issuer for loss or damage caused by their act of negligence or commission or omission.

The Debenture Holder(s) shall, without further act or deed, be deemed to have irrevocably given their consent to the Debenture Trustee or any of their agents or authorized officials to do all such acts, deeds, matters and things in respect of or relating to the Debentures as the Debenture Trustee may in their absolute discretion deem necessary or require to be done in the interest of the Debenture Holder(s). Any payment made by Issuer to the Debenture Trustee on behalf of the Debenture Holder(s) shall discharge Issuer *pro tanto* to the Debenture Holder(s). The Debenture Trustee shall protect the interest of the Debenture Holder(s) in the event of default by Issuer in regard to the timely payment of Interest and repayment of principal and shall take necessary action at the cost of Issuer. No Debenture Holder(s) shall be entitled to proceed directly against Issuer unless the Debenture Trustee, having become so bound to proceed, fail to do so. In the event of Issuer defaulting in payment of Interest on Debentures or Redemption thereof, any distribution of dividend by Issuer shall require the approval of the Debenture Trustee.

SECTION XXI STOCK EXCHANGE WHERE SECURITIES ARE PROPOSED TO BE LISTED

The Listed, Rated, Unsecured, Taxable, Redeemable, Non-Convertible Debentures are proposed to be listed on the Wholesale Debt Market (WDM) segment of the BSE and/or NSE (as per the relevant KID). The Issuer has obtained the in-principle approval of NSE/BSE for the listing of the Debentures vide letter bearing no. NSE/LIST/7725 Dated 28-05-2024 and DCS/COMP/AA/IP-PPDI/032/24-25 Dated 28-05-2024 respectively. For copy of the said 'in-principle' approval letter, please see "Annexure-IV" "In Principle Listing Approval" of this General Information Document. The Issuer shall make an application to the BSE to list the Debentures to be issued and allotted under this General Information Document and complete all the formalities relating to the listing of the Debentures within the stipulated time (as per applicable laws) from the date of closure of the Issue. If the permission to list and trade the Debentures is not granted by the Stock Exchange, our Issuer shall forthwith repay, without interest, all such amounts of money received from the Applicant in pursuance of this General Information Document, Section 42 of Companies Act, 2013 and other applicable provisions of law. If the default is made, our Company and every officer in default will be liable to fine as prescribed in Section 42 of the Companies Act, 2013 and other applicable provisions of the law.

In connection with the listing of Debentures with BSE and/or NSE, Issuer hereby undertakes that:

- i. It shall comply with conditions of listing of Debentures as may be specified in the Listing Agreement with BSE/NSE.
- ii. Ratings obtained by Issuer shall be periodically reviewed by the Credit Rating Agencies and any revision in the rating shall be promptly disclosed by Issuer to BSE/NSE.
- iii. Any change in rating shall be promptly disseminated to the holder(s) of the Debentures in such manner as BSE/NSE may determine from time to time.
- iv. Issuer, the Debenture Trustee and BSE shall disseminate all information and reports on Debentures including compliance reports filed by Issuer and the Trustees regarding the Debentures to the holder(s) of Debentures and the general public by placing them on their websites.
- v. Debenture Trustee shall disclose the information to the holder(s) of the Debentures and the general public by issuing a latest press release in any of the following events:
 - default by Issuer to pay Interest on Debentures or Redemption amount;
 - revision of rating assigned to the Debentures;
- vi. The information referred to in para above shall also be placed on the websites of the Trustees, Issuer and BSE/NSE.

SECTION XXII SERVICING BEHAVIOUR ON EXISTING DEBT SECURITIES AND OTHER BORROWINGS

Issuer hereby confirms that:

- i. The main constituents of Issuer's borrowings have been in the form of borrowings from Banks and Financial Institutions in domestic as well as Foreign market, market borrowings through Bonds etc.
- ii. Issuer has been servicing all its principal and interest liabilities on time and there has been no instance of delay or default since inception.
- iii. Issuer has neither defaulted in repayment/ Redemption of any of its borrowings nor effected any kind of rollover against any of its borrowings in the past.

SECTION XXIII UNDERTAKING REGARDING COMMON FORM OF TRANSFER

The Debentures shall be transferred subject to and in accordance with the rules/ procedures as prescribed by the NSDL/CDSL/Depository Participant of the transferor/ transferee and any other Applicable Laws and rules notified in respect thereof. The normal procedure followed for transfer of securities held in the dematerialized form shall be followed for transfer of these Debentures held in electronic form. The seller should give delivery instructions containing details of the buyer's DP account to his Depository Participant. The transferee(s) should ensure that the transfer formalities are completed prior to the Record Date. In the absence of the same, Interest will be paid/ Redemption will be made to the Person, whose name appears in the records of the Depository. In such cases, claims, if any, by the transferee(s) would need to be settled with the transferor(s) and not with Issuer.

In case of delay in execution of Debenture Trust deed, the Issuer will refund the subscription with agreed rate of Interest or pay penal Interest of 2% p.a. over the Coupon Rate till these conditions are complied with at the option of Investor.

In case of default in payment of Interest and/or principal Redemption on the due dates, additional rate of Interest of 2% p.a. over the Coupon Rate will be payable by Issuer for the defaulting period.

The Issuer shall complete all the formalities and seek listing permission within stipulated time. In case of delay in listing of the Debentures beyond specified timelines, the Issuer shall pay penal Interest of at least 1% over the Coupon Rate for the period of delay to the Investor (i.e. from the date of allotment to the date of listing) and shall be permitted to utilise the issue proceeds of its subsequent two privately placed issuances of securities only after receiving final listing approval from Stock Exchange(s).

In case of delay in allotment our Company shall pay Interest as per applicable rate of Interest.

SECTION XXIV DECLARATION AND UNDERTAKING

Investors are advised to read the risk factors carefully before taking an investment decision in the Debentures. For taking an investment decision, Investors must rely on their own examination of the Issuer and the Offer including the risks involved. The securities have not been recommended or approved by any regulatory authority in India, including the Securities and Exchange Board of India (SEBI) nor does SEBI guarantee the accuracy or adequacy of this document. Specific attention of Investors is invited to the statement of 'Risk Factors' given on Section X under the section 'Management Perception of Risk Factors'.

The Issuer, having made all reasonable inquiries, accepts responsibility for, and confirms that this General Information Document contains all information with regard to the Issuer and the Issue, that the information contained in this General Information Document is true and correct in all material aspects and is not misleading in any material respect, that the opinions and intentions expressed herein are honestly held and that there are no other facts, the omission of which make this General Information Document as a whole or any of such information or the expression of any such opinions or intentions misleading in any material respect.

The Issuer has no side letter with any Debt Securities holder except the one(s) disclosed in this General Information Document. Any covenants later added shall be disclosed on the Stock Exchange(s) website where the Debentures are listed.

We declare that the Permanent Account Number of directors have been submitted to the Stock Exchanges on which the non-convertible securities are proposed to be listed, at the time of filing the draft Offer document.

The Issuer is in compliance with the provisions of Securities Contracts (Regulation) Act, 1956 (42 of 1956), the Securities and Exchange Board of India Act, 1992, Companies Act and the rules made thereunder and SEBI Regulations.

The monies received under the Offer shall be used only for the purposes and objects indicated in the General Information Document.

The Issuer undertakes that:

- i. It will take all steps for completion of the formalities required for listing and commencement of trading at the Stock Exchange where the Debentures are proposed to be listed within specified time.
- ii. The funds required for refund of application money in case of non-allotment or partial allotment of Debentures shall be made available by the Issuer.
- iii. Necessary co-operation to the Credit Rating Agency shall be extended in providing true and adequate information till the debt obligations in respect of the Debentures till Debentures are outstanding.
- iv. The complaints received in respect of the Issue shall be attended to by the Issuer expeditiously and satisfactorily.
- v. That the Company shall disclose the complete name and address of the Debenture Trustee in the Annual Report.
- vi. Filing of Disclosure Document shall be as per SEBI NCS Regulations

Whatever is stated in this form and in the attachments thereto is true, correct and complete and no information material to the subject matter of this form has been suppressed or concealed and is as per the original records maintained by the promoters subscribing to the Memorandum of Association and Articles of Association.

Dear Sir,

Re: ICRA credit rating for Rs. 20,470 crore Bond Programme for FY2025 of Indian Renewable Energy Development Agency (IREDA) (instrument details in Annexure)

Please refer to your request for revalidating the rating letter issued for the captioned programme.

We confirm that the **[ICRA]AAA (pronounced ICRA triple A)** rating with a “**Stable**” outlook assigned to your captioned programme and last communicated to you vide our letter dated April 30, 2024, stands. Securities with this rating are considered to have the highest degree of safety regarding timely servicing of financial obligations. Such securities carry lowest credit risk.

In any of your publicity material or other documents wherever you are using our above rating, it should be stated as “**[ICRA]AAA(Stable)**”.

The other terms and conditions for the rating of the instrument shall remain the same as communicated vide our letters dated April 30, 2024 (Ref: ICRA/Indian Renewable Energy Development Agency Limited/30042024/1).

The rating, as aforesaid, however, should not be treated as a recommendation to buy, sell or hold long term debt/non-convertible debenture to be issued by you.

Rationale

The ratings continue to draw significant strength from Indian Renewable Energy Development Agency Limited's (IREDA) sovereign ownership (75% held by the Government of India (GoI) as on March 31, 2024), its strategic importance as the nodal agency for the promotion and implementation of Government policies and initiatives in the renewable energy (RE) sector, and its presence in the RE space. The ratings also factor in IREDA's higher business volumes, adequate capitalisation supported by the capital raise through the initial public offering (IPO) by the company in November 2023, and the improvement in the asset quality indicators and solvency profile, supported by lower slippages and recoveries from stressed accounts over the past few years. The ratings also consider IREDA's liquidity position, supported by the large proportion of significantly long-term borrowings that is commensurate with the long-term nature of its assets, and its ability to mobilise funds at competitive rates from diverse sources owing to its sovereign ownership.

Notwithstanding the improvement in the reported asset quality indicators, IREDA remains susceptible to vulnerable accounts, given the wholesale nature of the exposures, leading to concentration risk. The top 20 borrowers accounted for 37% of the total advances as on December 31, 2023 (40% as on March 31, 2023). Further, by virtue of its mandate, IREDA would continue to have sectoral concentration with the portfolio largely comprising RE exposures, though it is well diversified across sectors such as wind, solar, biomass, cogeneration and small hydro. In line with expectations, IREDA's asset quality indicators improved in FY2024. The gross and net stage 3 declined to 2.36% and 0.99%, respectively, as on March 31, 2024 from 3.21% and 1.66%, respectively, as on March 31, 2023 supported by limited slippages, recoveries from some loan accounts and portfolio growth. As on March 31, 2024, 1.5% of IREDA's total loan book consisted of projects, which have not been classified as stage 3 despite being overdue for more than 90 days due to judicial dispensation. However, the provision cover of 60% against these assets

provides comfort. Going forward, the company's ability to achieve recoveries from stressed¹ assets, control slippages on vulnerable assets and grow the loan book profitably would be the key rating monitorable.

The rating for the Gol fully-serviced bonds factors in the Gol's obligation towards the captioned debt programme as per the office memorandums (OMs) dated October 4, 2016 and October 20, 2016 issued by the Budget Division, Department of Economic Affairs, Ministry of Finance, Gol. As per these OMs, the Government has agreed to pay the principal and interest amounts due on the captioned debt programme through budgetary allocations. The rating for these bonds addresses the servicing of the debt as per the terms of the Memorandum of Understanding (MoU) between IREDA and the Ministry of New and Renewable Energy (MNRE).

The one notch lower rating assigned to IREDA's perpetual debt programme compared to the [ICRA]AAA rating for the other long-term debt programmes reflects the specific features of these instruments, wherein debt servicing is additionally linked to meeting the regulatory norms for capitalisation and reported profitability. The domestic regulatory norms for hybrid debt capital instruments include regulatory approvals from the Reserve Bank of India (RBI) for debt servicing (including principal repayments) in case the company reports a loss and is not liable to service the debt if it breaches the minimum regulatory capitalisation norms.

The Stable outlook reflects ICRA's expectation that IREDA will likely remain strategically important to the Gol as the nodal agency for the promotion and implementation of Government policies and initiatives in the RE sector, and its presence in the RE space. Thus, it would continue receiving support as and when required. Moreover, IREDA is expected to maintain adequate profitability and capital along with good financial flexibility.

ICRA has reaffirmed and withdrawn the rating for the Rs. 181.05-crore bond programme as the instruments have matured and were fully repaid, post maturity. The rating was withdrawn as per ICRA's policy on the withdrawal of credit ratings.

Key rating drivers and their description

Credit strengths

Sovereign ownership and strategic importance to Gol – The Gol is the majority shareholder in IREDA with a stake of 75% as on March 31, 2024. The company is of strategic importance to the Gol for the promotion and development of the RE sector in India. The ratings factor in the support from the Gol, which was last demonstrated by the equity infusion of Rs. 1,500 crore in March 2022. IREDA is the nodal agency for routing the Gol's various subsidies and grants to the RE sector like generation-based incentive schemes for solar and wind power projects, capital subsidy schemes for solar water heaters, and the IREDA-National Clean Energy Fund (NCEF) Refinance Scheme to refinance biomass (up to 10 MW) and small hydro (up to 5 MW) projects. Apart from this, the Gol has provided guarantees for IREDA's borrowings from multilateral and bilateral agencies (~13.5% of the total borrowings as on March 31, 2024).

ICRA believes IREDA will remain important to the Gol and will play a major role in various Gol renewable sector schemes, especially considering the increased importance of RE in the overall global landscape. A significant change in the company's strategic importance to the Gol could warrant a rating/outlook change.

Good financial flexibility; diversified borrowing profile – Supported by its sovereign ownership, IREDA has been able to raise funds at competitive costs in international as well as domestic markets. While the average cost of funds increased to 6.8% in FY2024 (6.1% in FY2023) due to the systemic rise in interest rates, it remains competitive. As on March 31, 2024, IREDA had a well-diversified borrowing profile with access to funding via bonds (41%), bank/financial institution (FI) loans (40%) and foreign currency loans (19%). The foreign currency debt is from multilateral agencies like Japan International Cooperation Agency

¹ AP discom-related projects, which have not been classified as stage 3 despite being overdue for more than 90 days due to judicial dispensation and restructured accounts, amounting to 1.5% of the book

(JICA), Kreditanstalt für Weideraufbau (KfW), the Asian Development Bank (ADB), the World Bank, the European Investment Bank (EIB), the Nordic Investment Bank (NIB), etc. Also, ~13.5% of the total borrowings were guaranteed by the GoI as on March 31, 2024. Going forward, ICRA believes that IREDA will continue to enjoy good financial flexibility and will be able to mobilise funds at competitive rates, which will support its business growth.

Increase in business volumes; improvement in asset quality – IREDA's portfolio grew by 27% to Rs. 59,698 crore as on March 31, 2024 from Rs. 46,982 crore on March 31, 2023, supported by the growth across the RE segments. The loan book consists of projects in segments like solar (27% of the loan book as on March 31, 2024), wind (18%), small hydro (12%), cogeneration, biomass, waste-to-energy & energy efficiency (3%) and others (36%). In line with expectations, IREDA's asset quality indicators continued to improve in FY2024. The gross and net stage 3 declined to 2.36% and 0.99%, respectively, as on March 31, 2024 from 3.21% and 1.66%, respectively, as on March 31, 2023 supported by limited slippages, recoveries from some loan accounts and portfolio growth. ICRA takes note of the improvement in the solvency to 6.7% as on March 31, 2024 from 12.9% as on March 31, 2023 owing to lower net stage 3 and better capital levels. As on March 31, 2024, 1.5% of IREDA's total loan book consisted of projects, which have not been classified as stage 3 despite being overdue for more than 90 days due to judicial dispensation. However, the provision cover of 60% against these assets provides comfort. Going forward, the company's ability to achieve recoveries from stressed assets, control slippages on vulnerable assets and grow the loan book profitably would be the key rating monitorable.

Adequate earnings profile – IREDA's net interest margin (NIM) remained range-bound (3.0-3.3%) over the past four years (FY2021-FY2024). However, lower operating expenses and the decline in credit costs due to limited slippages and some recoveries led to an improvement in the profitability indicators with the return on assets (RoA) and the return on equity (RoE) increasing to 2.2% and 17.3%, respectively, in FY2024 from 2.0% and 15.4%, respectively, in FY2023. Driven by higher business volumes, the profitability indicators are expected to witness further improvement over the medium term, provided the company is able to control incremental slippages. Overall, IREDA's ability to sustain the profitability metrics would be imperative for maintaining its credit profile.

Credit challenges

Adequate capitalisation indicators – The capitalisation profile remains adequate for the current scale of operations. IREDA's gearing improved to 5.7x as on March 31, 2024 from 6.8x as on March 31, 2023, post the capital raise in November 2023. The gearing is expected to increase gradually over the medium term. The net worth increased to Rs. 8,559 crore as on March 31, 2024 from Rs. 5,935 crore as on March 31, 2023, supported by the proceeds from the IPO and internal accruals. This has improved IREDA's competitive position, in terms of its ability to take higher exposures, supporting its book growth to some extent. The capital-to-risk weighted assets ratio (CRAR) of 20.11% as on March 31, 2024 was supported by lower risk weights to power distribution companies with state government guarantees. However, going forward, the share of such exposures is expected to decline, given the company's focus on financing the loan book mix of greenfield and brownfield projects. The company would need additional capital to grow as per business plans while maintaining prudent capitalisation over the medium term.

Exposure to vulnerable accounts and concentration risk – Portfolio vulnerability remains moderate, given the sizeable share of stage 2 assets (3.7% as on December 31, 2023 compared to 3.4% as on March 31, 2023) and exposure to stressed groups as well as projects where Andhra Pradesh (AP) discoms are the offtakers, as on March 31, 2024 (assets worth Rs. 887 crore, wherein dispensation was taken for non-classification as stage 3 despite overdues above 90 days). The wholesale nature of the loans, and hence the high concentration risk, exposes the company to the likelihood of lumpy slippages in the asset quality. The top 20 borrowers accounted for 37% of the total advances as on December 31, 2023 (40% as on March 31, 2023). While ICRA notes that IREDA's incremental disbursements have been towards projects/borrowers with relatively stronger credit profiles, thereby improving the average credit profile of the customers, it is crucial to reduce the portfolio concentration risk from the current level. The company's ability to control slippages and recover from the existing stressed exposures would be a key monitorable.

Liquidity position: Adequate

IREDA's liquidity profile is adequate as a large proportion of its borrowings from multilateral agencies is very long term in nature with the tenures going up to 40 years. The company has no negative cumulative mismatches across almost all the maturity buckets as per the asset-liability management (ALM) statement as on December 31, 2023. The company expects inflows from advances of Rs. 3,809 crore against debt repayments of Rs. 4,362 crore in the next 12 months, as per the ALM statement as on December 31, 2023. It had a cash and bank balance of Rs. 1,672 crore and unutilised sanctioned lines of Rs. 8,260 crore from domestic and foreign banks as on December 31, 2023, providing support to the liquidity profile. Given its good financial flexibility, ICRA expects IREDA's liquidity position to remain adequate going forward as well.

Rating sensitivities

Positive factors – Not applicable

Negative factors – A significant change in the strategic importance of IREDA in the Gol's initiatives for the promotion of the RE sector in the country and/or a significant decline in the Gol's shareholding may warrant a change in the ratings. Deterioration in the solvency level (Net stage 3/Tier I capital) to more than 40% on a sustained basis will be a negative for the credit profile.

About the company

Indian Renewable Energy Development Agency (IREDA) was incorporated on March 11, 1987 within the administrative control of the Ministry of New and Renewable Energy (MNRE) to promote, develop and extend financial assistance for renewable energy and energy efficiency/conservation projects. It is wholly owned by Gol and has been notified as a public financial institution and registered as a non-banking financial company – infrastructure finance company (NFBC-IFC) with the Reserve Bank of India (RBI). IREDA's board of directors comprises two executive directors, two government nominees from the MNRE and four independent directors. The company was also conferred Navratna status in April 2024 by the Department of Public Enterprises.

In FY2024, IREDA reported a profit after tax (PAT) of Rs. 1,252 crore on a gross asset base of Rs. 63,069 crore against a PAT of Rs. 865 crore on a gross asset base of Rs. 51,202 crore in FY2023. As on March 31, 2024, the company reported a CRAR of 20.11% and its gross and net stage 3 stood at 2.36% and 0.99%, respectively.

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. In issuing and maintaining its ratings, India Ratings relies on factual information it receives from issuers and underwriters and from other sources India Ratings believes to be credible. India Ratings conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security.

The manner of India Ratings factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in India where the rated security is offered and sold, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors.

Users of India Ratings ratings should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information India Ratings relies on in connection with a rating will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to India Ratings and to the market in offering documents and other reports. In issuing its ratings India Ratings must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings can be affected by future events or conditions that were not anticipated at the time a rating was issued or affirmed.

India Ratings seeks to continuously improve its ratings criteria and methodologies, and periodically updates the descriptions on its website of its criteria and methodologies for securities of a given type. The criteria and methodology used to determine a rating action are those in effect at the time the rating action is taken, which for public ratings is the date of the related rating action commentary. Each rating action commentary provides information about the criteria and methodology used to arrive at the stated rating, which may differ from the general criteria and methodology for the applicable security type posted on the website at a given time. For this reason, you should always consult the applicable rating action commentary for the most accurate information on the basis of any given public rating.

Ratings are based on established criteria and methodologies that India Ratings is continuously evaluating and updating. Therefore, ratings are the collective work product of India Ratings and no individual, or group of individuals, is solely responsible for a rating. All India Ratings reports have shared authorship. Individuals identified in an India Ratings report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only.

Ratings are not a recommendation or suggestion, directly or indirectly, to you or any other person, to buy, sell, make or hold any investment, loan or security or to undertake any investment strategy with respect to any investment, loan or security or any issuer. Ratings do not comment on the adequacy of market price, the suitability of any investment, loan or security for a particular investor (including without limitation, any accounting and/or regulatory treatment), or the tax-exempt nature or taxability of payments made in respect of any investment, loan or security. India Ratings is not your advisor, nor is India Ratings providing to you or any other party any financial advice, or any legal, auditing, accounting, appraisal, valuation or actuarial services. A rating should not be viewed as a replacement for such advice or services. Investors may find India Ratings ratings to be important information, and India Ratings notes that you are responsible for communicating the contents of this letter, and any changes with respect to the rating, to investors.

It will be important that you promptly provide us with all information that may be material to the ratings so that our ratings continue to be appropriate. Ratings may be raised, lowered, withdrawn, or placed on Rating Watch due to changes in, additions to, accuracy of or the inadequacy of information or for any other reason India Ratings deems sufficient.

Nothing in this letter is intended to or should be construed as creating a fiduciary relationship between India Ratings and you or between India Ratings and any

user of the ratings.

In this letter, "India Ratings" means India Ratings & Research Pvt. Ltd. and any successor in interest.

We are pleased to have had the opportunity to be of service to you. If we can be of further assistance, please email us at infogrp@indiaratings.co.in

Analytical Approach

The ratings factor in IREDA's strong linkages with the government of India (GoI) and its position as an apex institution for the expansion and financing of renewable energy (RE) projects in India. Based on IREDA's role as a public policy institution, its strategic importance, control and policy direction by the GoI and sovereign support, Ind-Ra classifies IREDA as a dependent public sector entity of the GoI.

Detailed Rationale of the Rating Action

IREDA continues to book healthy loan book growth and maintained adequate capital adequacy ratio with a headroom of 5.11% in FY24, higher than the regulatory requirement of 15%. The asset quality continues to improve with a consistent decline in its gross non-performing assets (NPA) and the net NPA, along with maintaining a comfortable provisioning coverage ratio of 58.80%.

While the company's cost of funds increased in FY24, the same is being passed on to its borrowers, Ind-Ra does not expect any considerable decline in the net interest margin (NIM) over the near-to-medium term.

For the perpetual bonds, the agency has factored in the loss-absorbing feature of these instruments in the event of an annual loss or the capital adequacy ratio falling below the regulatory norms.

For the GoI fully serviced bonds, the agency has factored in the memorandum of understanding between IREDA and MNRE for the repayment of the principal and the interest payments in respect of the extra budgetary resources raised by IREDA, which is being met by the GoI by making suitable budgetary provisions in the demand for the grants for MNRE.

List of Key Rating Drivers

Strengths

- Nodal public policy institution
- Sovereign support
- Navratna status
- Improved asset quality, better provisioning coverage
- Adequate capitalisation

Weaknesses

- Sectoral loan book concentration
- Moderation in NIM

Detailed Description of Key Rating Drivers

Nodal Public Policy Institution: Ind-Ra expects IREDA to keep playing a crucial role in reducing emissions as well as developing India's RE sector, particularly to achieve the target of 500GW by 2030. IREDA is the Gol's nodal agency to incentivise specifically the renewable energy sector and attract investments by way of subsidies and low-cost borrowings. It is the sole programme administrator of the MNRE's schemes, such as incentive schemes for wind and solar power projects; the roof-top solar power programme; a capital subsidy scheme for solar water heating systems; and the National Clean Energy Fund. IREDA also plays a crucial role in implementing the Production-linked Incentive scheme where IREDA earns incentive fees as the implementing agency.

Sovereign Support: IREDA is financially independent as it maintains its own accounts, and its debt/borrowings are not consolidated with those of the Gol. IREDA had received regular equity infusions from the Gol until FY15. While the government support in the form of equity infusions has stopped since IREDA has been accorded the status of Mini Ratna in June 2015, the government has also exempted IREDA from paying dividends since FY20. Nevertheless, the Gol in FY22 infused INR15 billion equity in IREDA, thereby clearly indicating its intent to support and facilitate the growth of India's RE sector through IREDA. To augment IREDA's capital base, the company got listed in FY24 through the issuance of fresh equity shares.

Navratna Status: In April 2024, IREDA was conferred with the status of 'Navratna' by the Gol, which is the second highest recognition for a public sector company. The Navratna status has given IREDA greater operational and financial autonomy and enables diversification of its operations to accelerate its business growth.

Improved Asset Quality; Better Provisioning Coverage: Over the near-to-medium term, Ind-Ra does not expect IREDA's asset quality to deteriorate significantly from FY24 levels. Though the NPA upgradations of INR0.56 billion in FY24 (FY23: INR1.92 billion) have been on a lower side from FY23, there were better recoveries of INR0.90 billion (INR0.70 billion). Also, there were higher slippages of INR0.44 billion in FY24 (FY23: INR0.08 billion). Nevertheless, IREDA's gross non-performing assets fell to INR14.11 billion (gross NPA%: 2.36%) in FY24 (FY23: INR15.13 billion, 3.21%). The net non-performing assets too declined to 0.99% in FY24 (FY23: 1.66%). The provision coverage ratio also increased to 58.80% in FY24 (FY23: 49.30%).

In case of Andhra Pradesh, the state government has sought to revise the terms of the power purchase agreements executed with solar and wind power developers, including for downward revision in tariffs. While the High Court of Andhra Pradesh has already stayed the matter (dated 25 July 2019), payments to all RE developers by discoms/customers could get affected until the matter is resolved. Furthermore, a downward revision in the tariff could materially affect the borrowers' cash flows, leading to increased delinquencies.

As per the statutory auditor report for FY24, six borrowers have obtained an interim order from the High Court of Andhra Pradesh to not to classify the account as non-performing asset even though the overdues are more than three months old. Accordingly, the loans outstanding of the borrower have not been classified as Stage III Assets.

The matter continues to be sub-judice, and any adverse ruling that could lead to a non-recovery of dues and a reclassification of such assets as NPAs would exacerbate the asset quality ratios. Nevertheless, IREDA has created an adequate provision of INR5.21 billion (loan outstanding at FYE24: INR8.73 billion) in the books of accounts as per expected credit loss. Accordingly, Ind-Ra does not expect the re-categorisation of such loans to lead to any steep profitability impairment.

Adequate Capitalisation: Ind-Ra expects that the implementation of the Reserve Bank of India's (RBI) draft prudential norms for provisioning for under construction projects, if implemented in the same form, to result in some decline in the capitalisation level from FY24 levels, over the medium-to-long term. However, the agency expects the capital buffers to be higher than the RBI-mandated level of 15% during the same period. IREDA saw strong franchise growth in FY23 and FY24, where the loan book (gross) grew 27% yoy to INR596 billion in FY24 (FY23: INR470 billion). Despite considerable growth in the loan book, IREDA's capital adequacy ratio (capital-to-risk weighted assets ratio; CRAR) improved to 20.11% in FY24 (FY23: 18.82%), increasing the gap between the actual capitalisation and the minimum requirement (as prescribed by RBI) to 5.11% (3.82%). The tier-1 ratio remained healthy at 18.08% in FY24 (15.71%).

In line with the overall increased capital base, the leverage (debt/net worth) decreased to 5.80x in FY24 (FY23: 6.77x). While the net worth improved to INR85.5 billion in FY24 (FY23: INR59.3 billion; FY22: INR52.7 billion), the growth in the

year-end debt was higher at INR496.8 billion (INR401.6 billion; INR276.1 billion).

Sectoral Loan Book Concentration: Ind-Ra expects the dominance of the solar and wind sector in IREDA's total loan book to continue in the near-to-medium term. In FY24, though the loan book concentration towards solar and wind marginally declined to 27% (FY23: 30%) and 18% (19%), respectively, it rules the loan book. Both the sectors would be instrumental in achieving the target of installed capacity of 500GW RE by 2030. During FY24, while the solar sector accounted for 23% and the wind sector accounted for 12% of the incremental disbursements. The disbursement of short-term loans of up to three years, mainly to the state government owned distribution and transmission companies, has helped in lowering the direct sectoral concentration. The share of loan facilities to state generation companies also increased to 7% in FY24 (FY23: 3%). Also, the lending towards ethanol rose to 5% of the loan book in FY24 (FY23: 2%). Small hydro, biomass, electric vehicle manufacturing, waste-to-energy loans occupied the remaining part of the loan book at FYE24.

Moderation in NIM: Ind-Ra expects IREDA's profitability to remain stable over the medium-to-long term. IREDA's annualised NIM fell to 3.16% in FY24 (FY23: 3.24%) as the increase in the yield was not sufficient to offset the rise in the cost of funds. Nevertheless, the key return indicators namely return on equity as well as return on total assets improved to 21.10% (FY23: 15.44%) and 2.48% (1.98%), respectively, on the back of an increase in the net income to INR12.52 billion (INR8.65 billion). The post provisioning indicators have mainly improved due to a 29% yoy increase in the net interest income to INR16.58 billion (FY23: INR12.85 billion).

Liquidity

Adequate: Ind-Ra believes IREDA's liquidity will remain adequate over FY25-FY26 due to the availability of sufficient long-term banking credit lines and the absence of any major asset liability mismatch on cumulative basis in any of the bucket. As on 30 April 2024, IREDA had INR20.55 billion of unutilised bank limits from domestic banks. As on 31 March 2024, IREDA had negative mismatches of INR0.94 billion, INR4.53 billion and INR6.37 billion in over one month and up to two months bucket, over two months and up to three months and over three months and up to six months, respectively. On a cumulative basis, the maximum mismatch, is of INR10.93 billion in over three months and up to six months. This was mainly due to IREDA's focus on long-tenor borrowings especially the ones raised from multilateral agencies.

IREDA also extends non-fund-based assistance to its borrowers in the form of guarantees and letters of comfort. Such assistance, which is classified as contingent liabilities, decreased to INR16.26 billion in FY24 (FY23: INR18.51 billion). As per IREDA's management, there was no any outflow of funds against the crystallisation of any such contingent liability over FY20-FY24. Nevertheless, any future invocation of such guarantees, leading to large cash outflows, could negatively impact IREDA's liquidity.

Rating Sensitivities

Positive: Not applicable

Negative: Future developments that could, individually or collectively on sustained basis, lead to a negative rating action include:

- inadequate financial and non-financial support from the GoI which may lead to a dilution in IREDA'S role as a sole institution for administering the role of MNRE
- the weakening of IREDA's operational and managerial linkages with the GoI
- inadequate budgetary provisions for servicing the GoI fully-serviced bonds throughout the tenure of the bonds
- the leverage sustaining above 8x
- the lack of adequate provisioning against delinquent assets (below 45%)
- the CRAR falling below 16%

Dear Madam,

Sub.: In-principle approval for listing of Non-Convertible Debentures on private placement basis.

This is with reference to your application requesting for in-principle approval for General Information Document Ref No. IREDA/BONDS/GID/2024-25/01, dated May 28, 2024, for proposed listing of unsecured/secured, redeemable, rated, noncumulative, taxable, non-convertible bonds in the nature of debentures of face value of either of Rs. 100000 or Rs 1000000 or Rs. 10000000 each or such other face value as per applicable law, to be issued in various tranches by Indian Renewable Energy Development Agency Limited on a private placement basis. In this regard, the Exchange is pleased to grant in-principle approval for the said issue, subject to adequate disclosures to be made in the General Information Document / Key Information Document in terms of SEBI (Issue And Listing of Non-Convertible Securities) Regulations, 2021 as amended from time to time, applicable SEBI Circulars and other applicable laws in this regard and provided the Company prints the Disclaimer Clause as given below in the General Information Document / Key Information Document after the SEBI disclaimer clause:

“As required, a copy of this Offer Document has been submitted to National Stock Exchange of India Limited (hereinafter referred to as NSE). It is to be distinctly understood that the aforesaid submission or in-principle approval given by NSE vide its letter Ref.: NSE/LIST/7725 dated May 28, 2024 or hosting the same on the website of NSE in terms of SEBI (Issue And Listing of Non-Convertible Securities) Regulations, 2021 as amended from time to time, should not in any way be deemed or construed that the offer document has been cleared or approved by NSE; nor does it in any manner warrant, certify or endorse the correctness or completeness of any of the contents of this offer document; nor does it warrant that this Issuer’s securities will be listed or will continue to be listed on the Exchange; nor does it take any responsibility for the financial or other soundness of this Issuer, its promoters, its management or any scheme or project of this Issuer.

National Stock Exchange Of India Limited

Every person who desires to apply for or otherwise acquire any securities of this Issuer may do so pursuant to independent inquiry, investigation and analysis and shall not have any claim against the Exchange whatsoever by reason of any loss which may be suffered by such person consequent to or in connection with such subscription /acquisition whether by reason of anything stated or omitted to be stated herein or any other reason whatsoever”

Please note that the approval given by us should not in any way be deemed or construed that the draft Offer Document has been cleared or approved by NSE; nor does it in any manner warrant, certify or endorse the correctness or completeness of any of the contents of this draft offer document; nor does it warrant that the securities will be listed or will continue to be listed on the Exchange; nor does it take any responsibility for the financial or other soundness of the Company, its promoters, its management or any scheme or project.

With reference to the Appendix to Annexure 1 dated May 28, 2024, provided by the Issuer to the Exchange, this in-principle approval granted by the Exchange is subject to the Issuer disclosing the below in the Key Information Document in terms of Para 3.3 of Chapter XIII of SEBI Master Circular No. SEBI/HO/DDHS/PoD1/P/CIR/2023/119 dated August 10, 2021, as amended from time to time.

1. Details of all the conditions upon which the call option will be exercised for perpetual debt instruments or such other instruments forming part of non-equity regulatory capital.
2. Risk factors, to include all the inherent features of instruments forming part of non-equity regulatory capital which, inter-alia, grant the issuer (in consultation with RBI), a discretion in terms of writing down the principal/ interest, to skip interest payments, to make an early recall etc., without commensurate right for investors to legal recourse, even if such actions of the issuer might result in potential loss to investors.

The in-principle approval granted by the Exchange is also subject to the Issuer submitting to the Exchange prior to opening of the issue and at the time of listing, a valid credit rating letter/rationale covering the total issuance amount under the Key Information Document.

Kindly also note that these debt instruments may be listed on the Exchange after the allotment process has been completed, provided the securities of the issuer are eligible for listing on the Exchange as per our listing criteria and the issuer fulfills the listing requirements of the Exchange. The issuer is responsible to ensure compliance with all the applicable guidelines issued by appropriate authorities from time to time including SEBI (Issue And Listing of Non-Convertible Securities) Regulations, 2021 from time to time, applicable SEBI Circulars and other applicable laws in this regard.

National Stock Exchange Of India Limited
