These risks may include, among others, business aspects, equity market, bond market, interest rate, market volatility and economic, political and regulatory risks and any combination of these and other risks. Prospective Investors should carefully consider all the information in this General Information Document, including the risks and uncertainties described below, before making an investment in the Debentures. All of these factors are contingencies which may or may not occur and the Issuer is not in a position to express a view on the likelihood of any such contingency occurring.

a) Management's Perception of Risk Factors

The Issuer is a private limited company incorporated under the provisions of the Act. The Issuer has been incorporated on July 31, 2024.

The main object of the Issuer is to carry on business to setup, develop, acquire, deal-in, manage warehousing, logistics, industrial infrastructures including industrial warehouse(s), industrial park(s), logistic park(s), and such other warehousing, logistic facilities. Prospective Investors should carefully consider the risks and uncertainties described below and the information contained elsewhere in this General Information Document before making an investment in the Debentures.

In making an investment decision, each Investor must rely on its own examination of the Issuer and the terms of the offering of the Debentures. The risks described below are not the only ones faced by the Issuer to affect the Issuer's ability to service the Debentures. The Issuer's business, prospects, financial condition, cash flows and results of operations could be materially and adversely affected by any of these risks. Additional risks not currently known to the Issuer currently deems immaterial may also impair the business, prospects, financial condition, cash flows and results of operations of the Issuer.

The financial and other related implications of the risk factors, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are certain risk factors where the financial impact is not quantifiable and, therefore, cannot be disclosed in such risk factors.

This Risk Factors also contain forward-looking statements that contain words or phrases such as "will", "would", "aim", "aimed", "will likely result", "is likely", "are likely", "believe", "expect", "expected to", "will continue", "will achieve", "anticipate", "estimate", "estimating", "intend", "plan", "contemplate", "seek to", "seeking to", "trying to", "target", "propose to", "future", "objective", "goal", "project", "should", "can", "could", "may", "will pursue" and similar expressions or variations of such expressions. These forward-looking statements involve risks, assumptions, estimates and uncertainties. Our actual results could differ materially from those anticipated in such forward-looking statements as a result of certain factors including the considerations described below and elsewhere in this Disclosure Document. The Issuer undertakes no obligation to update forward-looking statements to reflect events or circumstances after the date thereof.

b) Use of market data

Unless stated otherwise, macroeconomic and industry data, if used throughout this General Information Document, have been obtained from publications prepared by providers of industry information, government sources and multilateral institutions. Such publications generally state that the information contained therein has been obtained from sources believed to be reliable but that their accuracy and completeness are not guaranteed, and their reliability cannot be assured. Although the Issuer believes that industry data if used in this General Information Document are reliable, it has not been independently verified.

(This General Information Document is neither a prospectus nor a statement in lieu of prospectus)

c) A slowdown in economic growth in India could adversely affect our business

Any downturn in the macroeconomic environment in India may adversely affect the Issuer's business. Volatility, negativity, or uncertain economic conditions could undermine the business confidence and may have a significant impact on our results of operations. Changing demand patterns, economic volatility and uncertainty could have a material adverse impact on our business, financial conditions, and results of operations.

Further, we are incorporated in India and a majority of our assets and employees will be located in India. Consequently, our business, results of operations, financial condition and the market price of our equity shares will be affected by changes in interest rates in India, policies of the Government of India, including taxation policies along with policies relating to industry, political, social and economic developments affecting India.

d) Non-compliance with existing or changes to environmental, health and safety, labour laws and other applicable regulations by the Issuer may adversely affect our business, financial condition, results of operations and cash flows

The business activities in India are subject to extensive laws and government regulations, including in relation to safety, health and environmental protection. The Issuer may be subject to the laws and regulations governing relationships with employees in areas such as minimum wages, maximum working hours, overtime, working conditions, hiring and termination of employees, contract labour, work permits, maintenance of regulatory and statutory records and making periodic payments.

The Issuer may fail to comply with such regulations, which could lead to enforced shutdowns and other sanctions imposed by the relevant authorities. The Issuer may get involved or be held liable in litigation or other proceedings and consequently incur increased costs or penalties, suffer a disruption in our operations or result in our approvals and permits being revoked, any of which could adversely affect our business and results of operations.

e) The departure of the Company's key personnel could adversely affect its business and its ability to pursue its growth strategies

The Issuer's success depends on its ability to retain senior executives and key employees. The Issuer's continued success will depend on its ability to attract, recruit and retain a large group of experienced professionals and staff. If any senior executives or key employees were to leave, it could face difficulty replacing them. Their departure and the Issuer's failure to replace such key personnel could have a negative impact on the Issuer's business, including its ability to bid for and execute new projects as well as on its ability to meet its earnings and profitability targets and to pursue future growth strategies. As the Issuer's business grows, it may not be able to attract/ retain skilled employees which may have an adverse effect over its results of operations and financial performance.

f) Data Privacy and Cybersecurity Risk

Our dependency on the digital platform shall increase the risk of data breaches, cyber-attacks, and unauthorized access to sensitive information. These events could lead to financial loss, operational hindrance, regulatory scrutiny and reputational damage.

g) Risks relating to the Issue:

An investment in Debentures involves risks. These risks may include, among others, equity market, bond market, interest rate, market volatility and economic, political and regulatory risks and any

(This General Information Document is neither a prospectus nor a statement in lieu of prospectus)

combination of these and other risks. Some of these are briefly discussed below. Potential Investors and subsequent purchasers of the Debentures should be experienced with respect to transactions in instruments such as the Debentures. Potential Investors and subsequent purchasers of the Debentures should understand the risks associated with an investment in the Debentures and should only reach an investment decision after careful consideration, with their legal, tax, accounting and other advisers, of (a) the suitability of an investment in the Debentures in the light of their own particular financial, tax and other circumstances and (b) the information set out in this General Information Document.

The Debentures may decline in value and marketability and Investors should note that, whatever their investment in the Debentures, the minimum cash amount due at maturity will be equivalent to the face value of the Debentures.

More than one risk factor may have simultaneous effect with regard to the Debentures such that the effect of a particular risk factor may not be predictable. In addition, more than one risk factor may have a compounding effect which may not be predictable. No assurance can be given as to the effect that any combination of risk factors may have on the value of the Debentures.

h) Refusal of listing any security within past 3 (three) years.

In accordance with Indian law and practice, permissions for listing and trading of the Debentures issued pursuant to this Issue will not be granted until the relevant stock exchange approves the listing, which will be available only after an updated document is accordingly filed with the relevant authorities at the time of such listing. Approval for listing and trading will require all relevant documents authorising the issuing of the Debentures to be submitted. There could be a failure or delay in listing the Debentures on the stock exchange. If permission to deal in and for an official quotation of the Debentures is not granted by the stock exchange, the Debentures will remain unlisted.

i) Interest Rate Risk

All securities where a fixed rate of yield is offered, such as our Debentures, are subject to price risk. The price of such securities will vary inversely with changes in prevailing interest rates, i.e., when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of prevailing interest rates. Increased rates of interest, which frequently accompany inflation and/or a growing economy, are likely to have a negative effect on the price of our Debentures.

j) The Debentures may be Illiquid.

It is not possible to predict if and to what extent a secondary market may develop in the Debentures or at what price the Debentures will trade in the secondary market or whether such market will be liquid or illiquid. If so specified in this General Information Document, application has been made to list or quote or admit to trading the Debentures on the stock exchange or quotation system(s) specified. If the Debentures are so listed or quoted or admitted to trading, no assurance is given that any such listing or quotation or admission to trading will be maintained. The fact that the Debentures may be so listed or quoted or admitted to trading does not necessarily lead to greater liquidity than if they were not so listed or quoted or admitted to trading. The listing of the Debentures is subject to receipt of the final listing and trading approval from the Designated Stock Exchange. The Issuer may, but is not obliged to, at any time purchase the Debentures at any price in the open market or by tender or private agreement. Any Debentures so purchased may be resold or surrendered for cancellation. The more limited the secondary market is, the more difficult it may be for the Debentures Holders to realise value for the Debentures prior to redemption of the Debentures.

(This General Information Document is neither a prospectus nor a statement in lieu of prospectus)

k) The Debentures may not be a suitable investment for all purchasers.

Potential Investors should ensure that they understand the nature of the Debentures and the extent of their exposure to risk, that they have sufficient knowledge, experience, and access to professional advisers to make their own legal, tax, accounting and financial evaluation of the merits and risks of investment in the Debentures and that they consider the suitability of the Debentures as an investment in the light of their own circumstances and financial condition.

l) Any downgrading in credit rating of the Debentures may affect the value of the Debentures.

The rating is not a recommendation to purchase, hold or sell the Debentures in as much as the ratings do not comment on the market price of the Debentures or its suitability to a particular Investor. In the event of deterioration in the financial health of the Issuer, there is a possibility that the Rating Agency may downgrade the rating of the Debentures. In such cases, potential Investors may incur losses on re-valuation of their investment or make provisions towards sub-standard / non-performing investment as per their usual norms.

The right of the Debenture Holders to receive payments under the Debentures will be junior to certain liabilities preferred by law on an insolvency of the Issuer.

Upon an order for winding-up or liquidation in India, the assets of a company are vested in a liquidator who has wide powers to liquidate such company to pay its debt and administrative expenses.

m) Delays in court proceedings in India

If any dispute arises between the Issuer and any other party, the Issuer or such other party may need to take recourse to judicial proceedings before courts in India. It is not unusual for court proceedings in India to continue for extended periods. Disposition of cases may be further subject to various delays including multiple levels of appellate adjudication.

Exercise of powers by the Debenture Trustee is subject to equitable principles and supervisory powers of courts.

The exercise by the Debenture Trustee of the powers and remedies conferred on it under the Debenture Trust Deed and the Debenture Documents or otherwise vested in it by Applicable Law, will be subject to general equitable principles regarding the general supervisory powers and discretion of the Indian courts in the context thereof and the obtaining of any necessary governmental or regulatory consents, approvals, authorisations or orders.

Potential purchasers and sellers of the Debentures should be aware that they may be required to pay taxes in accordance with the laws and practices of India.

Payment or delivery of any amount due in respect of the Debentures may be subject to deduction of all applicable taxes, duties or other withholdings. Potential Investors who are in any doubt as to their tax position should consult their own independent tax advisers to ascertain tax impact. In addition, potential Investors should be aware that tax regulations and their application by the relevant taxation authorities change from time to time.

(This General Information Document is neither a prospectus nor a statement in lieu of prospectus)

n) Receipt of coupon or principal is subject to the credit risk of the Issuer.

Potential Investors should be aware that the receipt of any coupon payment, principal amount and any other amounts that may be due in respect of the Debentures at maturity is subject to the credit risk of the Issuer. Any stated credit rating of the Issuer reflects the independent opinion of the referenced Rating Agency as to the creditworthiness of the rated entity but is not a guarantee of credit quality of the Issuer. Any downgrading of the credit ratings of the Issuer by the Rating Agency may lower the value of the Debentures.

Investment in non-convertible securities involves a degree of risk and Investors should not invest any funds in such securities unless they can afford to take the risk attached to such investments. Investors are advised to take an informed decision and to read the risk factors carefully before investing in this offering.

o) Future legal and regulatory obstructions

The central and state governments serve multiple roles in the Indian economy, including producers, consumers and regulators, which may have a significant influence on the Issuer. Future government policies and changes in laws and regulations in India, including applicable foreign exchange laws and comments, statements, policy changes or any adverse interpretation of Applicable Law by any Governmental Authority, including but not limited to the SEBI or the RBI, may adversely affect the Debentures. The timing and content of any new law or regulation is not within the Issuer's control and such new law, regulation, comment, statement, policy change or adverse interpretation by any regulator could have an adverse effect on the market for and the price of the Debentures.

p) Political instability or changes in the Government could delay further liberalisation of the Indian economy and adversely affect economic conditions in India generally

The Issuer operates only within India and, accordingly, all of its revenues are derived from the domestic market. As a result, the Issuer is highly dependent on prevailing economic conditions in India and its results of operations are significantly affected by factors influencing the Indian economy. An uncertain economic situation, in India and globally, could result in a further slowdown in economic growth, investment and consumption. A slowdown in the rate of growth in the Indian economy could result in lower demand for renting immovable properties. Any slowdown in the growth or negative growth of sectors where we have a relatively higher exposure could adversely impact our performance our business prospects, results of operations, cash flows and financial condition.

Since 1991, successive central governments have pursued policies of economic liberalisation and financial sector reforms. Nevertheless, the role of the central and state governments in the Indian economy as producers, consumers and regulators has remained significant. However, there can be no assurance that the liberalisation policies announced by the Government in the past will continue in the future. A significant change in the Government's policies could affect business and economic conditions in India and could also adversely affect our business.

q) Other global economic, political and social conditions

Global economic, political and social conditions may harm the Issuer's ability to do business, increase its costs and negatively affect our business.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer

(This General Information Document is neither a prospectus nor a statement in lieu of prospectus)

credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our business.

India is vulnerable to natural disasters that could severely disrupt normal business operations. India has experienced natural calamities, such as tsunamis, floods, cyclones, droughts and earthquakes in the past few years. The extent and severity of these natural disasters determines their impact on the Indian economy and infrastructure. Unforeseen circumstances of below normal rainfall and other natural calamities could also have a negative impact on the Indian economy. As the Issuer's business and operations could be interrupted or delayed as a result of a natural disaster in India, such natural disasters could affect its business, financial condition and results of operations.

Terrorist attacks, civil unrest, regional conflicts and other acts of violence or war involving India and other countries could adversely affect the financial markets and could have a material adverse effect on the Issuer's business, financial condition and results of operations.

Certain events that are beyond the control of the Issuer such as terrorist attacks and other acts of violence or war may negatively affect the Indian markets and also adversely affect the worldwide financial markets and could potentially lead to a severe economic recession. These acts may also result in a loss of business confidence, make travel and other services more difficult and ultimately adversely affect the Issuer's business. India has experienced communal disturbances, terrorist attacks and riots during recent years. If such events reoccur, the Issuer's business may be adversely affected. Hostilities and tensions may occur in the future and on a wider scale. Military activity or terrorist attacks in India, as well as other acts of violence or war could influence the Indian economy by creating a greater perception that investments in India involve higher degrees of risk. Events of this nature in the future, as well as social and civil unrest in India, could influence the economy and could have a material adverse effect on the market for securities of Indian companies.

r) Risks owing to the Covid – 19 pandemic

Covid-19 was identified in late 2019 and has spread globally. The rapid spread resulted in governments and other authorities implementing numerous measures to try to contain the virus, such as travel bans and restrictions, quarantines, shelter-in-place orders and shutdowns. These measures have impacted and may further impact all or portions of the Issuer's workforce and operations and the operations of customers. The Issuer has been affected by the pandemic in the past and taken containment measures. Restrictions on the Issuer's workforce's access to its facilities could limit its ability to meet customer servicing expectations and have a material adverse effect on the Issuer's financial condition, cash flows and results of operations.

The Covid-19 pandemic also significantly increased economic and demand uncertainty and led to disruption and volatility in the global capital markets, which increased the cost of capital and adversely impacted the Issuer's access to capital. It is likely that the Covid-19 pandemic could cause an economic slowdown/ cause a global recession. These events could affect the value of the equipment financed or leased, the demand for financings and the financial condition and credit risk of our dealers and customers.

Uncertainties related to the magnitude and duration of the Covid-19 pandemic in case the virus is revived in the future may significantly adversely affect the Issuer's business, financial condition, results of operations, cash flows and / or outlook. These uncertainties include prolonged reduction or closure of the Issuer's operations, or a delayed recovery in such operations, additional closures as mandated or otherwise made necessary by governmental authorities, additional operating costs at facilities that remain open due to remote working arrangements, adherence to social distancing guidelines and other pandemic related challenges, absence of employees due to illness, requests

(This General Information Document is neither a prospectus nor a statement in lieu of prospectus)

by the Issuer's customers or dealers for payment deferrals and contract modifications, the impact of disruptions in the global capital markets and / or decline in the Issuer's financial performance, outlook or credit ratings, which could impact Issuer's ability to obtain funding in the future, and the impact of the pandemic on demand for the Issuer's products and services. All of these factors could materially and adversely affect our business, liquidity, results of operations and financial position.

s) Other Pandemic related risk in future

Other than Covid-19, other pandemics may spread infectious disease that can pose a global threat. Pandemics can create social and economic chaos. They can severely upset business operations by disrupting the supply chain and causing high absenteeism. This may impede our ability to complete projects in a timely manner. Managing the threats posed by a pandemic is critical for business survival and the Issuer is unable to accurately predict the near-term or long-term impact of the any other pandemic on its business that may occur in future.

Our objectives are to obtain reasonable assurance about whether the Standalone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. - These financial statements have been prepared to comply in all material aspects with applicable accounting principles in India, the applicable Accounting Standards prescribed under section 133 of the Companies Act, 2013 read with Rule 7 of the Companies (Accounts) Rules, 2014, as amended, the provisions of the Act (to the extent notified) and other accounting principles generally accepted in India to the extent applicable.

1.2 Use of estimates

- The preparation of financial statements in conformity with generally accepted accounting principles (GAAP) in India requires management to make estimates and assumptions that affects the reported amounts of assets and liabilities and the disclosures of contingent liabilities on the date of financial statements and reported amounts of revenue and expenses for that year. 1.4 Accounting for taxes on income:

- Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the provisions of the Income tax Act, 1961.
- The deferred tax for timing differences between the book profits and tax profits for the year is accounted for using the tax rates and laws that have been enacted or substantively enacted as of the balance sheet date. Deferred tax assets arising from timing differences are recognised to the extent there is a virtual/reasonable certainty that these would be realised in future and are reviewed for the appropriateness of the respective carrying values at each balance sheet date.

1.5 Earnings per share

- The basic earnings per share ("EPS") is computed by dividing the net profit/(loss) after tax for the year available for the equity shareholders by the weighted average number of equity shares outstanding during the year. For the purpose of calculating diluted earnings per share, net profit/(loss) after tax for the year available for equity shareholders by the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

1.6 Cash and cash equivalents

- Cash and Cash Equivalents for the purpose of the statement of cash flow comprise cash on hand and cash at bank including fixed deposits with original maturity period of three months or less and short term highly liquid investments with an original maturity of three months or less.
