SECTION 3: RISK FACTORS

Investment in non-convertible securities is risky and investors should not invest any funds in such securities unless they can afford to take the risk attached to such investments. Investors are advised to take an informed decision and to read the risk factors carefully before investing in this offering. For taking an investment decision, investors must rely on their examination of the issue including the risks involved in it. Specific attention of investors is invited to statement of risk factors contained under Section 3 of this General Information Document. These risks are not, and are not intended to be, a complete list of all risks and considerations relevant to the non-convertible securities or investor's decision to purchase such securities.

The following are the risks relating to the Company, the Debentures and the market in general envisaged by the management of the Company. Potential Investors should carefully consider all the risk factors stated in this General Information Document (and any relevant Key Information Document or PPOA for the relevant issuance of Debentures) for evaluating the Company and its business and the Debentures before making any investment decision relating to the Debentures. The Company believes that the factors described below represent the principal risks inherent in investing in the Debentures. Potential Investors should also read the detailed information set out elsewhere in this General Information Document (and any relevant Key Information Document or PPOA for the relevant issuance of Debentures) and reach their own views prior to making any investment decision.

3. GENERAL RISKS

3.1 RISKS IN RELATION TO THE NON-CONVERTIBLE SECURITIES:

- (a) Repayment is subject to the credit risk of the Issuer.

Potential Investors should be aware that receipt of the principal amount, (i.e. the redemption amount) and any other amounts that may be due in respect of the Debentures is subject to the credit risk of the Issuer. Potential Investors assume the risk that the Issuer will not be able to satisfy their obligations under the Debentures. In the event that bankruptcy proceedings or composition, scheme of arrangement or similar proceedings to avert bankruptcy are instituted by or against the Issuer, the payment of sums due on the Debentures may not be made or may be substantially reduced or delayed.

- (b) The secondary market for non-convertible securities may be illiquid.

The non-convertible securities may be very illiquid and no secondary market may develop in respect thereof. Even if there is a secondary market for the non-convertible securities, it is not likely to provide significant liquidity. Potential Investors may have to hold the Debentures until redemption to realize any value.

(c) Credit Risk & Rating Downgrade Risk

The Rating Agency has assigned the credit ratings to the Debentures. In the event of deterioration in the financial health of the Issuer, there is a possibility that the rating agency may downgrade the rating of the Debentures. In such cases, potential Investors may incur losses on revaluation of their investment or make provisions towards sub-standard/ non-performing investment as per their usual norms.

(d) Changes in interest rates may affect the price of Debentures.

All securities where a fixed rate of interest is offered, are subject to price risk. The price of such securities will vary inversely with changes in prevailing interest rates, i.e. when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of prevailing interest rates. Increased rates of interest, which frequently accompany inflation and/or a growing economy, are likely to have a negative effect on the pricing of the Debentures.

(e) Tax Considerations and Legal Considerations:

Special tax considerations and legal considerations may apply to certain types of investors. Potential Investors are urged to consult with their own financial, legal, tax and other advisors to determine any financial, legal, tax and other implications of this investment.

(f) Accounting Considerations:

Special accounting considerations may apply to certain types of taxpayers. Potential Investors are urged to consult with their own accounting advisors to determine implications of this investment.

(g) Material changes in regulations to which the Issuer is subject could impair the Issuer's ability to meet payment or other obligations.

The Issuer is subject generally to changes in Indian law, as well as to changes in government regulations and policies and accounting principles. Any changes in the regulatory framework could adversely affect the profitability of the Issuer or its future financial performance, by requiring a restructuring of its activities, increasing costs or otherwise.

3.2 RISKS IN RELATION TO THE SECURITY CREATED IN RELATION TO THE DEBT SECURITIES. FURTHER, ANY RISKS IN RELATION TO MAINTENANCE OF SECURITY COVER OR FULL RECOVERY OF THE SECURITY IN CASE OF ENFORCEMENT

In the event that the Company is unable to meet its payment and other obligations towards Investors under the terms of the Debentures, the Debenture Trustee may enforce the Security as per the terms of security documents, and other related documents executed in relation to the Debentures. The Debenture Holder(s)' recovery in relation to the Debentures will be subject to (i) the market value of such Security (ii) finding willing buyers for the Security at a price sufficient to repay the Debenture Holder(s)' amounts outstanding under the Debentures. There is a risk that the value realised from the enforcement of the Security may be insufficient to redeem the Debentures.

Where any Debentures issued pursuant to this General Information Document and any relevant Key Information Document or PPOA for the relevant issuance of Debentures are secured against a charge to the tune of at least 100% of the principal and interest amount in favour of the Debenture Trustee, it shall be the duty of the Debenture Trustee to monitor that the security is maintained. The possibility of recovery of 100% of the amount shall depend on the market scenario prevalent at the time of enforcement of the security.

3.3 REFUSAL OF LISTING OF ANY SECURITY OF THE ISSUER DURING PRECEDING THREE FINANCIAL YEARS AND CURRENT FINANCIAL YEAR BY ANY OF THE STOCK EXCHANGES IN INDIA OR ABROAD:

As of date, the Issuer has not been refused of listing of any security during preceding three financial years and current financial year by any of the stock exchanges in India or abroad and therefore, this would not be applicable.

3.4 LIMITED OR SPORADIC TRADING OF NON-CONVERTIBLE SECURITIES OF THE ISSUER ON STOCK EXCHANGES:

As of date, we are not aware of any limited or sporadic trading of the non-convertible securities of the Issuer on stock exchanges and therefore, this would not be applicable.

3.5 IN CASE OF OUTSTANDING DEBT INSTRUMENTS OR DEPOSITS OR BORROWINGS, ANY DEFAULT IN COMPLIANCE WITH THE MATERIAL COVENANTS SUCH AS CREATION OF SECURITY AS PER TERMS AGREED, DEFAULT IN PAYMENT OF INTEREST, DEFAULT IN REDEMPTION OR REPAYMENT, NON-CREATION OF DEBENTURE REDEMPTION RESERVE, DEFAULT IN PAYMENT OF PENAL INTEREST WHEREVER APPLICABLE

As of date, the Issuer has not defaulted in compliance with any material covenants agreed to by the Issuer and therefore, this would not be applicable.

3.6 RISKS RELATED TO THE BUSINESS OF THE ISSUER

- (a) *Majority of the Issuer's loans are unsecured and the clients of these unsecured loans are of the high risk category and if the Issuer is unable to control the level of non-performing loans ("NPAs") in the future, or if the Issuer's loan loss reserves are insufficient to cover future loan losses, the financial condition and results of operations may be materially and adversely affected.*

A majority of the Issuer's loans are unsecured and the clients of these unsecured loans are of the high risk category. There is uncertainty on the client's ability to fulfil its loan obligations as clients typically do not have bank accounts or proper income proof verification so it can be difficult to verify all client details and assess the risk. Such non-performing or low credit quality loans can negatively impact our results of operations.

The Issuer has various procedures and process controls in place to mitigate the risk.

As at December 31, 2024, the gross NPA was INR 661.27 Mn on a gross portfolio of INR 15,026.60 Mn (including managed / securitized portfolio of INR Nil Mn).

- (b) *The Issuer cannot assure that it will be able to effectively control and reduce the level of the NPAs of its Client Loans. The amount of its reported NPAs may increase in the future as a*

result of growth of Client Loans, and also due to factors beyond its control, such as over-extended member credit that it is unaware of. If the Issuer is unable to manage NPAs or adequately recover its loans, the results of its operations will be adversely affected.

The current loan loss reserves of the Issuer may not be adequate to cover an increase in the amount of NPAs or any future deterioration in the overall credit quality of Client Loans. As a result, if the quality of its total loan portfolio deteriorates the Issuer may be required to increase its loan loss reserves, which will adversely affect its financial condition and results of operations.

The borrowers might be vulnerable if economic conditions worsen or growth rates decelerate in India, or if there are natural disasters such as floods and droughts in areas where the Issuer's members live. Moreover, there is no precise method for predicting loan and credit losses, and the Issuer cannot assure that its monitoring and risk management procedures will effectively predict such losses or that loan loss reserves will be sufficient to cover actual losses. If the Issuer are unable to control or reduce the level of its NPAs or poor credit quality loans, its financial condition and results of its operations could be materially and adversely affected.

(c) ***The Issuer's business operates through a large number of rural and semi urban branches and is exposed to operational risks including fraud***

The Issuer is exposed to operational risks, including fraud, petty theft and embezzlement, as it handles a large amount of cash due to high volume of small transactions. This could harm its operations and its financial position.

As the Issuer handles a large amount of cash through a high volume of small transactions taking place in its network, the Issuer is exposed to the risk of fraud or other misconduct by its employees or outsiders. These risks are further compounded due to the high level of delegation of power and responsibilities that the Issuer's business model requires. Given the high volume of transactions processed by the Issuer, certain instances of fraud and misconduct may go unnoticed before they are discovered and successfully rectified. Even when the Issuer discovers such instances of fraud or theft and pursue them to the full extent of the law or with its insurance carriers, there can be no assurance that the Issuer will recover any such amounts. In addition, the Issuer's dependence upon automated systems to record and process transactions may further increase the risk that technical system flaws or employee tampering or manipulation of those systems will result in losses that are difficult to detect.

The Issuer maintains an internal audit process to ensure the operations team follows the defined procedures and reports any deviations to the operations staff and management team. The Issuer also has a strong MIS system that has a wide range of data that can be used to monitor financial and operational performance.

To mitigate the above risk, the Issuer maintains an internal audit process to ensure the operations team follows the defined procedures and reports any deviations to the operations staff and management team. The Issuer also has a MIS system able to generate data analysis that can be used to monitor financial and operational performance.

(d) ***The Issuer is exposed to certain political, regulatory and concentration of risks***

Due to the nature of its operations, the Issuer is exposed to political, regulatory and concentration risks. The Issuer believes a mitigant to this is to expand its geographical reach and may consequently expand its operations other states. If it is not effectively able to manage such operations and expansion, it may lose money invested in such expansion, which could adversely affect its business and results of operations.

Large scale attrition, especially at the senior management level, can make it difficult for the Issuer to manage its business.

If the Issuer is not able to attract, motivate, integrate or retain qualified personnel at levels of experience that are necessary to maintain the Issuer's quality and reputation, it will be difficult for the Issuer to manage its business and growth. The Issuer depends on the services of its executive officers and key employees for its continued operations and growth. In particular, the Issuer's senior management has significant experience in the banking and financial services industries. The loss of any of the Issuer's executive officers, key employees or senior managers could negatively affect its ability to execute its business strategy, including its ability to manage its rapid growth. The Issuer's business is also dependent on its team of personnel who directly manage its relationships with its members. The Issuer's business and profits would suffer adversely if a substantial number of such personnel left the Issuer or became ineffective in servicing its members over a period of time. The Issuer's future success will depend in large part on its ability to identify, attract and retain highly skilled managerial and other personnel. Competition for individuals with such specialized knowledge and experience is intense in this industry, and the Issuer may be unable to attract, motivate, integrate or retain qualified personnel at levels of experience that are necessary to maintain its quality and reputation or to sustain or expand its operations. The loss of the services of such personnel or the inability to identify, attract and retain qualified personnel in the future would make it difficult for the Issuer to manage its business and growth and to meet key objectives.

- (e) ***The Issuer's business and results of operations would be adversely affected by strikes, work stoppages or increased wage demands by employees***

The employees are not currently unionized. However, there can be no assurance that they will not unionize in the future. If the employees unionize, it may become difficult to maintain flexible labour policies, and could result in high labour costs, which would adversely affect the Issuer's business and results of operations.

- (f) ***The Issuer's insurance coverage may not adequately protect it against losses. Successful claims that exceed its insurance coverage could harm the Issuer's results of operations and diminish its financial position***

There are various types of risks and losses for which the Issuer does not maintain insurance, such as losses due to business interruption and natural disasters, because they are uninsurable. A successful assertion of such large claims against the Issuer that exceeds its available insurance coverage or results in changes in its insurance policies, including premium increases or the imposition of a larger deductible or co-insurance requirement, could adversely affect the Issuer's business, financial condition and results of operations. Such risks are normally minimized through strong Risk Management practices of the Company.

- (g) ***Issuer requires certain statutory and regulatory approvals for conducting business and failure to obtain or retain them in a timely manner, or at all, may adversely affect operations.***

NBFCs in India are subject to strict regulation and supervision by the RBI. Pursuant to guidelines issued by the RBI (including the NBFC Directions) the Issuer is required to maintain its status as a NBFC in order to be eligible for categorization as priority sector advance for bank loans. The Issuer requires certain approvals, licenses, registrations and permissions for operating its business, including registration with the RBI as a NBFC. Further, such approvals, licenses, registrations and permissions must be maintained/renewed over time, applicable requirements may change and the Issuer may not be aware of or comply with all requirements all of the time. Additionally, the Issuer may need additional approvals from regulators to introduce new insurance and other fee based products to its members. In particular, the Issuer is required to obtain a certificate of registration for carrying on business as a NBFC that is subject to numerous conditions. In addition, its branches are required to be registered under the relevant shops and establishments laws of the states in which they are

located. The shops and establishments laws regulate various employment conditions, including working hours, holidays and leave and overtime compensation. If the Issuer fails to obtain or retain any of these approvals or licenses, or renewals thereof, in a timely manner, or at all, its business may be adversely affected. If the Issuer fails to comply, or a regulator claims that it has not complied, with any of these conditions, the Issuer's certificate of registration may be suspended or cancelled and it shall not be able to carry on such activities. If the Issuer fails to comply with the NBFC Directions and fails to maintain the status of NBFC, it will not be eligible for priority sector loans from the Indian banking sector and may also attract penal provisions under the RBI Act, 1934 for non-compliance.

(h) ***The economic fallout from the spread of the COVID-19 virus may impact the Issuer's business prospects, financial condition, result of operations and credit risk***

The spread of the COVID-19 virus has affected millions across the globe and the same coupled with measures taken by the governments including lockdowns/ curfew has not only affected day to day lives of people but has also given a hard blow to the supply chain of factories, with trade routes being disturbed and slowing down of the industry, trade, commerce and business activities across all sectors.

The COVID-19 virus pandemic is adversely affecting, and is expected to continue to adversely affect, our operations, business, liquidity and cashflows, and the Issuer has experienced and expect to continue to experience unpredictable reductions in demand for certain of our products and services. Further, since a good fraction of our borrowers are small transport road operators, the disruption due to COVID-19 virus will also have an impact on their business as well as repayment capacity of the loans taken from us.

However, the extent of negative financial impact cannot be reasonably estimated at this time but a sustained economic slowdown may significantly affect our business, financial condition, liquidity, cashflows and results of operations and the same will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of the COVID-19 virus and the actions to contain the COVID-19 virus or treat its impact, among others. Consequently, there may be a negative effect on the Company's ability to service the obligations in relation to the Debentures.

(i) ***Economic Risk in India:***

The Issuer operates only within India and, accordingly, all of its revenues are derived from the domestic market. As a result, it is highly dependent on prevailing economic conditions in India and its results of operations are significantly affected by factors influencing the Indian economy. An uncertain economic situation, in India and globally, could result in a further slowdown in economic growth, investment and consumption. A slowdown in the rate of growth in the Indian economy could result in lower demand for credit and other financial products and services and higher defaults. Any slowdown in the growth or negative growth of sectors where the Issuer has a relatively higher exposure could adversely impact its performance. Any such slowdown could adversely affect its business, prospects, results of operations and financial condition.

5.7 About the Issuer:

(a) Overview and a brief summary of the business activities of the Issuer

Company Overview

The Company is focused on financial services and Value Chain Finance for Inclusive Growth with a belief that for a value chain to work well, all the chain actors need have access to formal financial instruments including non-asset products customized to suit the requirements of the Value Chain as well as the stakeholders operating within. The organization functions to permeate targeted sectors viz. enterprises and value chains in homogeneous economies (like a district). The key to the interventions of the Company is to understand the local needs of a district specifically the major value chains, to develop selective customized financial solutions across these value chains and thus create vibrant local economies that are efficiently connected to mainstream financial markets. The Company aims to address major drivers of an economy together with catalytic interventions like Warehousing, Bulk milk chilling plants etc., to make the entrepreneurial and value chain activities operate more efficiently.

Industry Overview

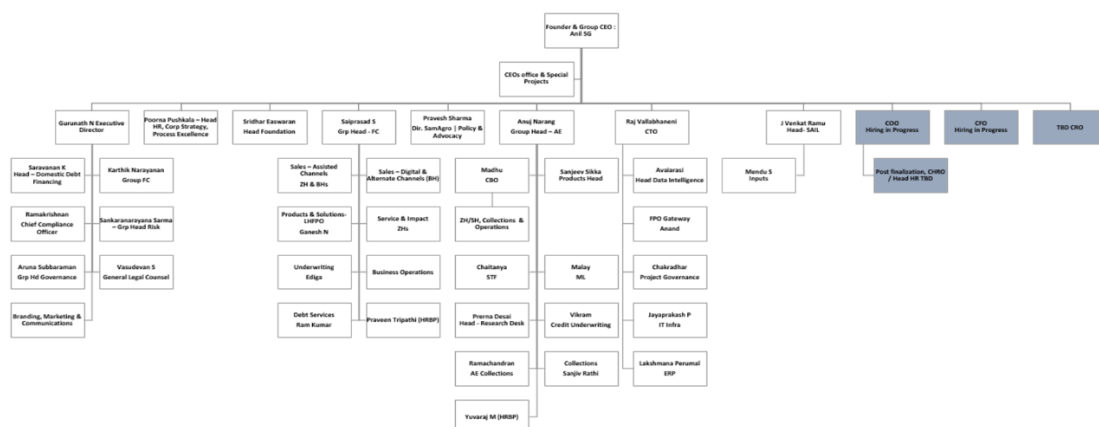

Agricultural value chain actors need access to finance to develop their businesses. For example take smallholder farmers with fragmented land holdings Smallholder farmers have very restricted access to markets and lack access to warehouses or storage facilities to store their harvest. Consequently, they are strained to sell their

(This General Information Document is neither a prospectus nor a statement in lieu of a prospectus)

surplus produce during the harvest season, when the prices are low. Intermediaries (traders) who can invest their capital as well as access storage space, time and again take advantage of smallholders' limitations: they accumulate agricultural harvest at very low prices and sell them during the most beneficial market conditions. In addition, farmers face enormous difficulties in obtaining credit for their agricultural activities because of the lack of financial services in rural areas. Existing products from formal financial institutions like Banks, MFIs are usually ill suited to the smallholder farmers' livelihoods and frequently on account of their cash flows. Hence these farmers are constrained to resort to borrowing from informal sources.

Even for small enterprises that constitute the MSMEs (Micro Small and Medium Enterprises), which play a vital role in the nation's economy, the lack of access to finance and timely credit is the most important reasons for below than normal utilization of their capabilities. The MSMEs which add value to the agricultural produce and also play intermediation role in an Agri value chain, need finance to increase their capacity. MSMEs that operate in activities like dairy farms, trading of commodities need funds to procure raw materials, and stock, pay wages to staff, meet other working capital requirements and at the same time for expansion of business.
